Max Air

New High Performance motor runs cooler and quieter. Noise levels as low as 65 decibels. Small and compact, ideal for bathtubs: 9" l x 6.5" w x 6.75" h. 1.5" tapered fitting on outlet. Available options include: air or electronic 3- speed control, and heater. The revolutionary new motor dramatically improves performance while running cooler and quieter. Unique housing design with bottom air inlet creates a tortuous path, trapping noise inside the blower for ultra quiet performance. Small profile with easy access mounting tabs makes installation a snap. Certified through Underwriters Laboratory, Canadian Standards, and TUV Rheinland.

Air enters through the bottom of the Max Air blower creating a tortuous path, trapping noise inside the blower
