General Information:
Monterey Soil Stimulator helps to promote root growth. Excellent for gardens, ornamentals, all bedding plants, lawns, trees, shrubs, vegetables and fruit trees. Monterey Soil Stimulator contains calcium which helps prevent blossom end rot in tomatoes.

APPLICATION RATES	
ONCE A MONTH	**2 Tbs. Per 1 Gallon of Water**
TWICE A MONTH	**1 Tbs. Per 1 Gallon of Water**
EACH WATERING	**1 Tsp. Per 1 Gallon of Water**

Can be applied in a water bucket, pump-up or hose-end sprayer.

Soil Application: See the chart above to determine application rates. Thoroughly soak soil around plant's root zone with correct dilution.

Foliar Application: See the chart above to determine application rates. To prevent and alleviate blossom end rot, apply 2 Tbs. of Monterey Soil Stimulator every 2 weeks by foliar application. Do not apply as a foliar spray in drought conditions.

Apply foliar applications early in the morning or late in the evening. Do not water for at least 24 hours to avoid washing off fertilizer. This allows uptake of nutrients into the leaf.

Lawns/Turf: Apply 2 Tbsp. per gallon of water to 1,000 sq. ft. during the growing season. Apply with a pump-up or hose-end sprayer.

Apply only to actively growing lawns/turf. Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn/garden. Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices. Check with your county or city government to determine if there are local regulations for fertilizer use.

NOTE: Adding more than the recommended rate may burn plants. Do not use spraying devices that have been used with herbicides unless thoroughly cleaned.

IMPORTANT NOTICE: This product may stain. Keep spray off areas such as: sidewalks, patios, driveways, fences, and painted areas. As a precaution, rinse off these areas with water after applying.

California Proposition 65:
