Patented Press-in Check Valve

Just push it inside of any standard pipe fitting

Patented **Press-in** Check Valve

Congratulations, you have just purchased a unique **Press-in** check valve. To install, simply wet the "O" ring with water and push the **Press-in** check valve inside of any standard pipe fitting such as coupling, elbow, tee, etc.

Press From This Direction

Wet the "O" ring with water for easier installation

Water Flow Direction

Check Valve Assembly

Check Valve Will Be Captured Between Two Pipes

To install, do not use excessive cement, solvent or glue. Only place the **Press-in** check valve into the bottom of the fitting. Then apply the cement and press the pipe. Make sure to have sufficient room in the fitting to cement the pipe. **afra**s will not be responsible for any leak in the system.
