Twilight Fire Beads

Twilight is a time of quiet, when all creatures of the morning head back to their homes for rest. It is a time of strange and mysterious beauty. For some human beings, It is a time of reflection and meditation. If your customers have a spiritual side, we have the perfect gift for them... our twilight fire beads.

Black and opaque in appearance, our beautiful twilight fire beads seem to embody a mysterious elegance. Perfect for formal affairs, these smooth, luxurious glass pieces are sure to impress even the most hard-to-please audience. They will go wonderfully in light backgrounds which help to accentuate the darkness of the beads, but will also do very well with other backdrops. When the fire feature is lit, all gazes will be fixated on the mesmerizing display of dark black shimmering beads, shining and reflecting the bright yellow light of the flames dancing above them.

A Practical Alternative to Ceramic Logs & Stones

Our twilight fire beads aren't just exquisite to behold, but also very practical. They do a wonderful job of completely covering the floor of a fire feature, effectively hiding the pipes and tubes which are sometimes visible in gas fireplaces and fire pits. This makes fire beads a much more desirable alternative to the more commonly seen ceramic logs and fire stones.

Extremely Durable, Safe & Long Lasting!

All our fire beads are made from high quality glass and undergo a unique 5-step manufacturing process which renders them their brilliant shine and also allows them to withstand harsh weather and temperatures of up to 1300 degrees Fahrenheit without the slightest damage or discoloration. Under normal use, these amazing glass beads can last your customers a lifetime.

Another great advantage of fire beads is that they do not emit any harmful chemicals, smoke, soot, or ash. This means that they hardly require any cleaning and are very easy to maintain!

If your customers need something elegant and beautiful for their next formal affair, introduce them to our twilight fire beads!
