

1/4" Pacific Blue Reflective Fire Glass

Product ID: AFG-AFF-PABLRF

Weight: lbs

Manufacturer: American Fire Glass

1/4" Pacific Blue Reflective Fire Glass

Some things in life have the power to beckon you, even when you're thousands of miles away. The ancient Pacific ocean, with its peaceful and serene blue hue, is one of those things. Now, your customers can bring the blue majesty of the Pacific ocean to their homes, with our 1/4" Pacific blue reflective fire glass.

This gorgeous blue fire glass is ideally suited for locations with water features, such as swimming pools, but will look spectacular in almost any backdrop whether used in indoor fireplaces or outdoor fire pits. When the fire feature is lit, all onlookers will be treated to a mesmerizing display as the Pacific blue reflective fire glass gleams and reflects the bright yellow flames dancing above them.

A Practical Alternative to Ceramic Logs & Stones

Our Pacific blue reflective fire glass is not just dazzling to behold, but also very practical. It does a terrific job of covering the entire floor of a fire feature, effectively hiding the pipes and tubes which are often visible in gas fire features. This makes fire glass a more desirable alternative to the more commonly seen ceramic logs and fire stones.

Extremely Durable, Safe & Long Lasting!

All of our tempered, reflective fire glass has been engineered to withstand harsh weather and temperatures of up to 1300 degrees Fahrenheit without the slightest change in color or shape. This beautiful blue glass is guaranteed to retain its dazzling reflective properties even after years of use.

Another major advantage of fire glass is that it does not emit any harmful chemicals, smoke, ash, or

soot, thus it hardly requires any cleaning and is very easy to maintain!

If your customers yearn for the blue ocean... introduce them to our 1/4" Pacific blue reflective fire glass!
