

1/2" Cobalt Reflective Fire Glass

Product ID: AFG-AFF-COBLRF12
Weight: lbs
Manufacturer: American Fire Glass

1/2" Cobalt Reflective Fire Glass

Deep cobalt blue, with its intense electrifying hue, is not a color for the weak of heart. It communicates daring, strength and confidence. When your customers add our 1/2" cobalt reflective fire glass to their fireplace or fire pit, they will not only be setting up an exciting fire glass display worth remembering, but also making a bold statement about their personality...

Our cobalt reflective fire glass is not only a stylish and beautiful addition to any indoor fireplace, but also a dazzling accent to any outdoor fire pit. When unlit, the cobalt color is a rich, electrifying blue, but once set aflame, the gas flames rise up through the blue, transforming it into a brilliant royal purple. The reflective property of the fire glass further enhances the resplendent display, quickly becoming the focus of all attention.

A Practical Alternative to Ceramic Logs & Stones

Our cobalt blue fire glass is not just dazzling to behold, it is also very practical. It does a great job of completely covering the floor of a fire feature, thereby hiding the unseemly pipes and tubes which are often visible in gas fireplaces and fire pits. This makes fire glass a much more preferable alternative to the commonly seen ceramic logs and fire stones.

Extremely Durable, Safe & Long Lasting!

American Fireglass' tempered fire glass is a product engineered to withstand temperatures of up to 1300 degrees Fahrenheit and harsh weather, which means your customers are acquiring a product that will never fade, crack, or lose its shape. Used correctly, this amazing glass can last your customers a lifetime!

Furthermore, our fire glass gives off no smoke, ash, or soot, which means cleaning and maintenance

is a cinch!

If your customers are looking for something bold and intriguing, introduce them to our 1/2" cobalt reflective fire glass today.
