

1/2" Copper Fire Glass

Product ID: AFG-AFF-COP12

Weight: lbs

Manufacturer: American Fire Glass

1/2" Copper Fire Glass

Copper has been prized for thousands of years and is still one of the most important materials on Earth. It has a naturally lustrous and luxurious look to it which brings a touch of style and warmth to everything it adorns. If your customers want to bring their drab old fireplace back to life, we offer copper fire glass from our 1/2 inch fire glass collection. As lovely as the copper fire glass from our 1/4 inch collection, this 1/2 inch glass is clearly chunkier, allowing for better air circulation and delivering a bigger and more impressive flame.

Our 1/2" copper fire glass works well in both indoor fireplaces and outdoor fire pits. It easily blends with a wide variety of color schemes and adds a touch of sophistication to its surroundings. The large, dancing flames rising from the bed of copper fire glass provide a fire experience that will leave onlookers mesmerized.

A Practical Alternative to Ceramic Logs & Stones

This lovely fire glass is not just gorgeous to behold, it is also very practical. It does a great job of covering the entire floor of a fire feature, effectively concealing the unseemly pipes and tubes which are often visible in gas fireplaces and fire pits. This makes fire glass a great alternative to traditional methods such as ceramic logs and fire stones.

Extremely Durable, Safe & Long Lasting!

All our fire glass is manufactured from high quality tempered glass which has undergone a unique, 5 step process that renders it a brilliant shine and allows it to withstand harsh weather and temperatures of up to 1300 degrees Fahrenheit without sustaining any damage, or discoloration. Used correctly, this amazing product could last your customers a lifetime.

Another advantage of our 1/2" copper fire glass is that it does not emit any harmful chemicals,

smoke, ash, or soot, which means it hardly requires any cleaning and is very easy to maintain!

If your customers want to give a facelift to their fire feature, we highly recommend our 1/2 inch copper fire glass!
