

pH Control System

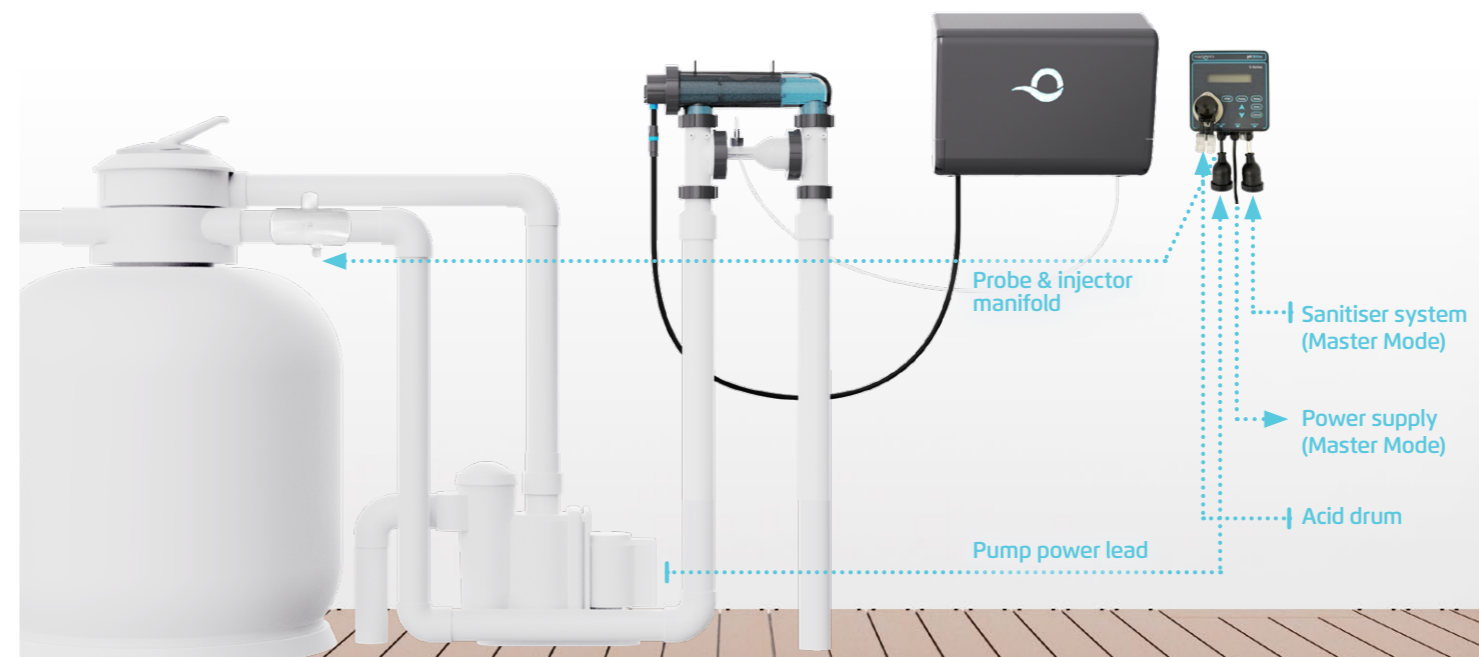

pH Drive Perfectly Balanced, Optimised Pool Water

The Maytronics pH S Drive effortlessly balances pool water, ensuring a safe and enjoyable swimming experience. This innovative system automatically adjusts the pool's pH levels, reducing the need for manual testing and chemical adjustments.

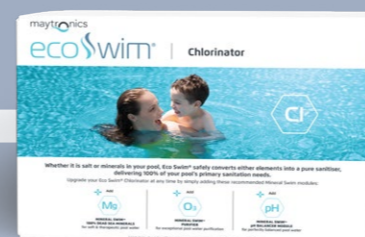

- 
EASY TO USE
 Set & forget with smart pool maintenance set-up.
- 
COMFORTABLE BATHING
 Enjoy all year-round balanced pool water for a comfortable swimming experience any time.
- 
SAFE TO USE
 No more pH testing, manual handling or adjusting pool chemicals.
- 
REDUCES POOL MAINTENANCE
 Takes the guesswork out of maintaining your pool's water chemistry.
- 
EXCLUSIVE DESIGN
 For use with all Maytronics water treatment systems.
- 
pH BALANCED WATER
 Reduces the amount of care taking time your pool requires.

- 1 High-Quality Peristaltic Pump**
 The upgraded peristaltic pump is made from durable materials designed to withstand acid, ensuring reliable and long-lasting performance.
- 2 Heat Pump Interlock**
 Activates the pool pump for heat pump demand, even outside normal filtration cycles. Ideal for shared heating and filtration plumbing.
- 3 Pool Pump Outlet**
 Connect your Pool Pump to this weather-resistant outlet, compatible with both Master and Slave modes for seamless operation.
- 4 Separate Sanitiser Output**
 Ensures precise sanitising without overdosing during extended filtration for Heat Pump use. Includes degassing function and maintenance controls.
