

ULTIMA II

FILTRATION SYSTEM

THE ULTIMATE FILTER FOR AQUATIC LIFE

- Combines both biological and mechanical filtration in one compact body.
- Simply rotate the valve and the patented cyclonic backwash system does the dirty work for you.
- Ultima II Filters are designed for high flow rates, extreme fish loads, and elevated feed rates.

AQUA®
ULTRAVIOLET

Independent laboratory and field testing confirm the Ultima II out performs the competition

Ultima Models	Valve Inlet/Outlet	Pond/Tank Size In Gallons	Min Flow	Max Flow	Optimal Flow Pump Recommendation
Ultima - 1,000	1 1/2" or 2"	500 to 1,000 gals	500 GPH	1,200 GPH	1,000 GPH at 10' of head
Ultima - 2,000	1 1/2" or 2"	1,000 to 2,000 gals	1,000 GPH	2,500 GPH	2,000 GPH at 10' of head
Ultima - 4,000	1 1/2" or 2"	2,000 to 4,000 gals	2,000 GPH	4,500 GPH	4,000 GPH at 10' of head
Ultima - 6,000	2"	4,000 to 6,000 gals	3,000 GPH	7,500 GPH	6,000 GPH at 10' of head
Ultima - 10,000	2"	6,000 to 10,000 gals	5,000 GPH	7,500 GPH	7,500 GPH at 10' of head
Ultima - 20,000	2"	10,000 to 20,000 gals	7,000 GPH	7,500 GPH	7,500 GPH at 10' of head
Ultima - 30,000	2"	20,000 to 30,000 gals	7,000 GPH	7,500 GPH	7,500 GPH at 10' of head
Professional Units					
Side Mount - 30,000	3"	20,000 to 30,000 gals	10,000 GPH	20,400 GPH	15,000 GPH at 10' of head
Side Mount - 60,000	3"	30,000 to 60,000 gals	15,000 GPH	20,400 GPH	20,000 GPH at 10' of head
Standard BAF	6"	60,000 to 100,000 gals	20,000 GPH	24,000 GPH	24,000 GPH at 10' of head

"Cyclonic" Backwash System

- Simply set the valve to backwash & rinse
- Internal jets do all the work for you
- Never get your hands dirty

Bio-Media Features

- Highest surface area for growth of beneficial bacteria
- Unique patented tubular design
- Prevents clumping & channeling
- Protects bacteria while dislodging unwanted debris
- Pre-Seeded with bacteria to start colonization quickly
- Media never needs to be replaced
