

CCH® Endurance System

Commercial Pool & Spa Water Sanitation System

FEEDER & TABLET SPECIFICATIONS >

The CCH® Endurance system is an innovative approach to commercial pool chlorination. The patent-pending, slow dissolving tablets work with our easy to use CCH® Endurance feeder, an automatic solution that meets the needs of the modern pool facility. With the simplicity of an erosion feeder, the CCH® Endurance feeder's streamlined design is easy to install, service and requires minimal operator attention. There's never been a better time to upgrade to the latest in high-tech pool performance-delivering clear and sparkling water time and time again.

Powerful Performance

- 3-in-1 product that:
 - Chlorinates consistently
 - Increases calcium to protect plaster
 - Increases alkalinity to stabilize pH
- Adds no cyanuric acid to your pool for less wasteful drainage
- Dissolves slowly to give long lasting action
- Tablets work with ORP sensors

Formulation Efficiencies

- Highly concentrated, to reduce shipping and handling costs
- Will not cause reduction of ORP
- More concentrated than liquid bleach
- Class 2 oxidizer

The Centers for Disease Control and Prevention (CDC) does not allow the use of stabilized sanitizers such as trichlor and dichlor for shocking a pool after a fecal accident (Model Aquatic Health Code (MAHC) 6.5). CCH® Endurance non stabilized tablets do not contain cyanuric acid which slows down the kill rate of chlorine for pathogens such as *Cryptosporidium*. According to the MAHC, crypto remediation with chlorine cannot be conducted with >15 ppm CYA. CCH® Endurance, the superior choice to kill harmful germs that can cause waterborne illnesses.

- Longer shelf life when compared to liquid bleach
- Adds less total dissolved solids (TDS) than liquid bleach

Use ONLY with CCH® Endurance Chlorinating Tablets

FEEDER & TABLET SPECIFICATIONS

Dimensions

Feeder dimensions (max).....Width: 12" (30.48 cm)
Depth: 13" (33.02 cm)
Height: 31" (78.74 cm)
 Weight (empty).....15 lbs (6.80 kg)
 Tubing size (O.D.)5/8" (15.87 mm)

Capacity

Capacity (weight of tablets)6.4 lbs (2.90 kg)

Tablet Specifications

Active IngredientCalcium Hypochlorite
 Available Chlorine.....68%
 Weight265 gms
 Diameter2.7"
 ColorBlue
 Container25 lb pails

Construction

- unique thread design creates positive seal
- snap feature indicates the lid is tightened completely
- easy to load cartridge
- drain port to prevent spills
- inlet and outlet ports use standard 5/8" tubing

locking mechanism allows for an easier reload with less mess, more control

adjustable grid height and flow rate to control output rate
