4 FIRST AID MEASURES

**Inhalation:** Give oxygen or artificial respiration if needed. If symptoms develop, move victim to fresh air. If symptoms

persist, obtain medical attention.

**Skin Contact:** Promptly flush skin with water for at least 15 minutes to ensure all chemical is removed. Remove

contaminated clothing and wash before reuse. If reddening develops and/or persists, obtain medical

attention.

**Eye Contact:** Flush with large amounts of water for at least 15 minutes, lifting upper and lower lids occasionally. Remove

contact lenses is present and easy to do so. If eye irritation persists, obtain medical attention.

**Storage Requirements:** Keep container tightly closed.

Do not store in direct sunlight.

Store away from strong acids and strong oxidizing agents.

# 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls: All ventilation should be designed in accordance with OSHA standard (29 CFR 1910.94). Use

local exhaust at filling zones and where leakage and dust formation is probable. Use

mechanical (general) ventilation for storage areas. Use appropriate ventilation as required to

keep Exposure Limits in Air below TLV & PEL limits.

Personal Protective Equip: Eye/face protection:

When using material, personal protective equipment is not required. If desired, ensure that all safety equipment should be tested and approved under appropriate government standards

such as NIOSH (US) or EN 166 (EU).

Skin protection:

Not required. If desired, handle with gloves made from Neoprene, Nitrile or Buma rubber. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact. Dispose of contaminated gloves according to

applicable laws and laboratory practices.

**Body Protection:** 

Not require. If desired, use chemically resistant safety glasses. Type of protective equipment should be selected based on concentration amount and conditions of use of this material.

Respiratory protection:

Full-face dust respirator may be required as backup to engineering controls when proper engineering controls are not in place to keep TLV and PEL limits below defined thresholds.

Respiratory protection must comply with 29 CFR 1910.134.

Control of environmental exposure:

Prevent leakage or spillage if safe to do so. Do not let material enter drains.
