

MINI BEAM + STAKE & SHIELD

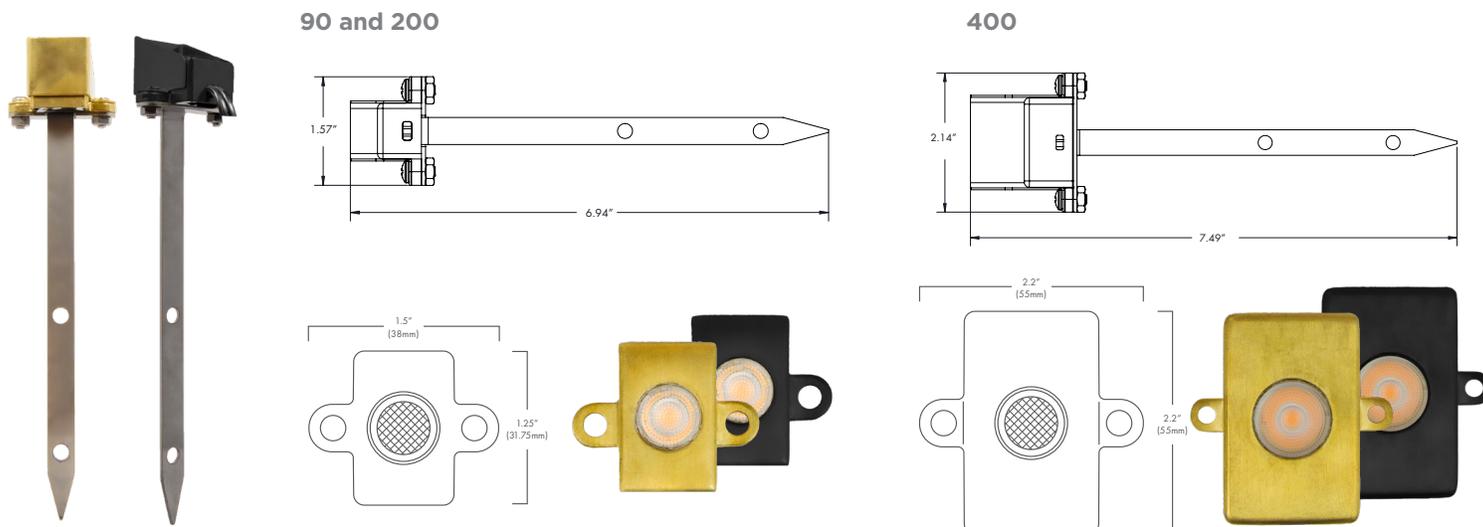

DESCRIPTION

The Mini Beam is the perfect lamp to bring light to hard-to-reach places, whether under stairs, stone walls, stone lanterns, any small space, even under water. This directional product solves the issue of fitting a fixture and a lamp into a small area, and features Enhanced ESD (Electro-Static Discharge) protection (IEC-61000-4-2). We recommend using LightingShrink connections for Mini Beams. Dimmable with Brilliance Dimmer and most magnetic transformers. Now packaged and pre-assembled with the Stake & Shield accessory. If your application calls for it, shape or bend the stake to optimize the light's aim. The stake and shield can easily be removed other applications. ETL Certified for UL 1838 and CSA C22.2 Standards. Available in a Brass or Black (BK) finish.
