How It Works

HYDROXYL RADICAL INJECTION

STEP 1: Air Goes In The System

From ambient air, the system pulls in Oxygen (O_2).

STEP 2: O_2 Converts Into O_1

In the system, a patented process turns O_2 into Atomic Oxygen (O_1). No additional chemicals are used in this process.

STEP 3: O_1 & Water Create Hydroxyl Radicals

In the plumbing, O_1 air is injected & reacts with Water (H2O) to create high concentrations of Hydroxyl Radicals (OH-). These hydroxyls destroy the toughest unwanted contaminants on contact.
