

MIRACOTE REDISPERSIBLE POLYMER PRODUCTS

Redispersible polymer based repair products require only the addition of potable water and are troweled or poured-in-place. They are ideal for

concrete restoration and resurfacing over properly prepared, clean, sound and durable deteriorated concrete; or as an underlayment substrate for microtoppings, carpet, linoleum, resilient tile or ceramic tile.

MIRACOTE Mirapatch DP

(Patch Mortar)

- Rigid trowel applied
- Sag-resistant patch material
- Suitable for horizontal or vertical application
- Smooth rough areas of concrete
- Compatible with asphaltic and latex tile mastics

MIRACOTE SL (Self-leveling Underlayment)

- Poured-in-place
- Self-levels in one pour from 3/16" (5mm) to 2" (51mm)
- Shrinkage compensating
- Long rehealing time
- Fast property development
- Bleed water free formulation

MIRACOTE LIQUID CATALYST POLYMER RESURFACER

Liquid polymer catalyst based high performance silica sand free cementitious resurfacing product. It is applied in two applications with brush, roller, trowel, squeegee or sprayer.

Designed for vehicular and pedestrian traffic. Available in standard and custom colors.

It is resistant to salts, scaling from freeze-thaw conditions and ideally suited for interior or exterior resurfacing of concrete, concrete block and masonry.

MIRACOTE MPC (Multipurpose Protective Coating)

- Highly flexible
- Trafficable
- UL 790 Class A Fire Resistance Rating
- Thickness of 3/32" (2.4mm)
- Resists UV degradation
- Smoothing and leveling coating
- Decorative finish
