

# MiraStamp

Two-component, polymer-modified, cementitious thin-stamped concrete overlay

## Product Features

- Two-component, high polymer-to-cement ratio
- Tenacious adhesion to concrete and other substrates
- Outstanding salt & freeze thaw resistance
- Excellent resistance to impact and abrasion
- Ideal for interior and exterior applications
- Suitable for both pedestrian and vehicular traffic
- Extensive range of designs, colors and textures
- Easy to install using conventional stamping tools

## Renovate and Overlay Concrete with the Beauty of Mirastamp

Designed for use with conventional concrete stamping tools and techniques, **Mirastamp** restores, transforms and beautifies old existing concrete and other compatible substrates that call for a new distinctive look. This two-component, polymer-modified, thin-stamped architectural overlayment can simulate virtually any impression, pattern or texture utilizing commercially available concrete stamps.

With excellent adhesion, freeze/thaw resistance, compressive, tensile and flexural properties, **Mirastamp** provides the optimal durability and wear for both interior and exterior applications in any climate. Whether exposed to pedestrian or vehicular traffic, **Mirastamp** is an ideal solution for renovating concrete where performance and years of service life are key requirements for your project.

## Don't replace it – Miracote It!

**MiraStamp** can be installed anywhere from ¼" to 5/8" depending on the pattern of the desired impression and required concrete stamp mat. Available in a standard off-white powder, **MiraStamp** can be integrally colored with Miracote ColorPax LIP pigment packs, stained with the use of our architectural water-based, co-polymer Mirastain, or both pigmented and stained to achieve diverse and unique architectural finishes. Seal and protect your finished **MiraStamp** with a clear **Miracote** sealer or topcoat of your choice from a wide range of acrylic, siloxane and polymeric scientifically superior sealer and coating technologies from Crossfield Products Corp.

### Product Applications

- Resurface and restore concrete
- Deferred concrete floor toppings
- Commercial, retail & residential flooring
- Educational & institutional facilities
- Food & beverage areas
- Hotels and resorts

### Where to Use

- Pedestrian walkways
- Atriums & courtyards
- Driveways & porte-cocheres
- Balconies & breezeways
- Pool decks and promenades
- Plaza decks
- Foyers and entryways
