

MPC

Two-component, polymer-modified, cementitious Multipurpose Protective Coating

Product Features

- Water vapor permeable – reduces corrosion of rebar
- Excellent adhesion and flexibility on concrete and other substrates
- Prevents intrusion of water, chlorides and carbon dioxide
- Excellent resistance to freeze thaw cycles, impact and abrasion
- Ideal for interior and exterior applications
- Suitable for both pedestrian and vehicular traffic
- Extensive choice of colors and textures – enhanced curb appeal

Renovate, Waterproof and Protect with the Versatility of MPC

MPC (Multipurpose Protective Coating) is an extremely durable, cost-effective and versatile protective coating that is “breathable” and allows for the transmission of moisture vapor from within concrete and other porous substrates without blistering or delamination. By lowering internal moisture content, **MPC** helps reduce the potential for corrosion of steel reinforcement in concrete.

Designed for both exterior and interior use, **MPC** restores and protects concrete and a variety of other surfaces from the consequences of exposure to chlorides, water intrusion, carbonation, freeze/thaw, and damage from impact and abrasion. With **MPC** a variety of finishes can be achieved to either restore concrete to a “like new” appearance or provide enhanced visual interest and curb appeal through a wide range of available colors, textures and patterns.

MPC

Two-component, polymer-modified, cementitious Multipurpose Protective Coating

Don't replace it – Miracote It!

Miracote MPC is applied in two or more coats by trowel, brush, roller, spray or squeegee to a typical minimum thickness of 1/16" depending on traffic and exposure conditions. Available in a natural gray and white powder blends, **Miracote MPC** (using white powder) can be integrally colored with Miracote ColorPax LIP pigment packs, stained with the use of our architectural water-based, co-polymer Mirastain, or both pigmented and stained to achieve diverse and unique architectural finishes. Seal and protect your finished **MPC** surface with a clear Miracote sealer or topcoat of your choice from a wide range of scientifically superior siloxane, acrylic, and polymeric sealer and protective coating technologies from Crossfield Products Corp.

Product Applications

- Resurface and restore concrete
- Deferred concrete floor toppings
- Commercial, retail & residential flooring
- Educational & institutional flooring
- Food & beverage areas
- Hotels and resorts
- Mechanical equipment rooms
- Raised access floor waterproofing

Where to Use

- Pedestrian walkways
- Atriums & courtyards
- Driveways & porte-cocheres
- Balconies & breezeways
- Pool decks and promenades
- Plaza decks & topping slabs
- Parapets and columns
- Walls & vertical surfaces
