## CS-309™ -25

### Non-Yellowing, Acrylic Curing and Sealing Compound

#### DESCRIPTION

CS-309-25 acrylic curing and sealing compound is a clear, transparent, ready-to-apply, non-yellowing liquid compound formulated from special acrylic polymers and quick-evaporating solvents that effectively cures and seals freshly placed concrete.

Once properly applied, CS-309-25 provides a premium-grade film for optimum moisture retention. This produces a hard, dense, high-compressive strength concrete. CS-309-25 will minimize hair-checking as well as premature cracking, dusting, spalling, and other common defects that result when concrete is not properly cured. This easy-to-use compound dries quickly and protects the concrete during construction. It resists adhesion of mortar droppings and permits easier cleanup.

#### USES

CS-309-25 is ideal for application on commercial and industrial concrete surfaces, sidewalks, patios, multi-level parking decks, driveways, and parking areas ... wherever you want to simultaneously cure and seal exterior concrete surfaces. The use of CS-309-25 on any exterior concrete surface provides a durable, long-lasting finish that offers improved resistance to chemicals, oil, grease, deicing salts, and abrasion. CS-309-25 provides an attractive, low sheen finish that enhances the natural appearance of the concrete.

#### SPECIFICATIONS

- Complies with U.S. EPA maximum allowable VOC requirements.

#### LEED INFORMATION

May help contribute to LEED credits:

- MR Credit 2: Construction Waste Management
- MR Credit 5: Regional Materials

#### FEATURES/BENEFITS

- Provides a totally clear membrane for new or existing concrete that will not yellow.
- Provides a tough, durable, uniform, long-lasting film on exterior concrete surfaces.
- Cures and seals freshly placed concrete simultaneously in one application.
- Produces a premium-grade seal, yielding optimum moisture retention.
- Minimizes hair checking, cracking, dusting, spalling, and other defects common to uncured or improperly cured concrete.
- Provides improved resistance to chemicals, oil, grease, deicing salts, and abrasion during construction.
- Non-blushing, breathable film.
- Provides an attractive sheen that enhances the natural appearance of concrete.
- Applies easily ... dries quickly for less downtime.
- Permits easy cleanup and housekeeping ... reduces floor maintenance costs.
- VOC compliant.

#### PACKAGING

1 Gallon (3.79 Liter) Cans (6 per case)

5 Gallon (18.93 Liter) Pails

55 Gallon (208.20 Liter) Drums

#### SPECIFICATIONS

- ASTM C 309, Type 1, Classes A & B
- ASTM C 1315, Type I, Class A
- AASHTO M 148, Type 1 Classes A & B
- USDA Accepted

#### COVERAGE\*

300-600 ft.<sup>2</sup>/gal. (7.37-14.73 m<sup>2</sup>/L)

\*Coverage may vary due to porosity and condition of concrete.

CONTINUED ON REVERSE SIDE...

## APPLICATION

**Surface Preparation ... Existing (Old) Concrete:** Concrete surface must be clean and dry with all stains, oil, grease, dust, and dirt removed prior to application. We recommend ULTRITE DEGREASER® from W. R. MEADOWS for cleaning.

**New Concrete:** CS-309-25 should be applied when surface water has completely disappeared and the concrete surface will not be marred by walking workmen.

**Application Method ...** Use a sprayer or short-nap roller to apply a uniform film. Avoid puddling in low areas. If puddles occur, brush or roll them out. A standard industrial-grade sprayer, equipped with a neoprene hose and gaskets, as well as a 5941 spray nozzle (or equivalent) is recommended for best results.

For optimum performance, apply first coat at 600 ft.<sup>2</sup>/gal. After the first coat has thoroughly dried, apply a second coat at 600 ft.<sup>2</sup>/gal. NOTE: The second coat should be applied at a right angle.

**Drying Time ...** CS-309-25 dries quickly. Drying times may be extended depending on application rate, temperature, humidity, and project conditions. Restrict foot traffic for at least four hours. Twelve hours is preferable.

**Cleanup ...** Application equipment should be cleaned promptly after use with xylene or toluene.
