

KwikSeal™

Professional Quality

Low-profile, durable solution for Polyethylene pipes, eliminating common issues with traditional insert fittings. With a one-piece design and molded-in barb seal, it's secure and hassle-free, built to last without gaskets or clamps.

Features

- One-piece hinged design for easy installation
- Molded-in barb seal with no gaskets or seals to lose
- Rust-free, corrosion-resistant bolts and nuts made from fiberglass-reinforced nylon
- Low-profile design with zero flow restriction
- Withstands over 400 psi without leaks
- 2 1/2" length protects the seal if the pipe is kinked or damaged near the saddle tee
- Nut Driver compatible with all KwikSeal™ products
- Patented KwikSeal™ (US Patent #4789189)

Applications

Poly pipe in agriculture & commercial irrigation and landscape applications.
