

SPECTRAQUARTZ® Colored Quartz

makes swimming pool walls sparkle

A swimming pool's plaster finish is the critical element in creating beautiful and distinctive color and texture. Now you can make your pool truly sparkle with SpectraQuartz, a clear quartz product that's like no other plaster additive.

Used in raw form, and added to plaster that's colored with powder or liquid pigment, SpectraQuartz reflects and refracts light to give pool walls a glass-like translucency. Or, you can choose a color-tinted option for an equally striking effect that can't be achieved with any other product.

Whether you are building a new pool or refinishing an existing pool, SpectraQuartz will transform your plaster finish into a spectacular display of light and color.

The water color examples shown here are digital representations. Actual finish and water color appearance of your pool may vary as the limits of photography and printing make it impossible to represent the precise color of SpectraQuartz Colored Quartz or water color appearance.

Whether you are building a new pool, or refinishing an existing pool, SpectraQuartz will add lasting beauty to your plaster finish. Extremely hard and durable 100% natural quartz, with permanently colored grains that won't bleed or fade...it's the simple and elegant way to make your pool a statement of style and quality.

Contact your local pool builder and ask for SpectraQuartz Colored Quartz.
