

MODULAR SPILL PLATFORMS

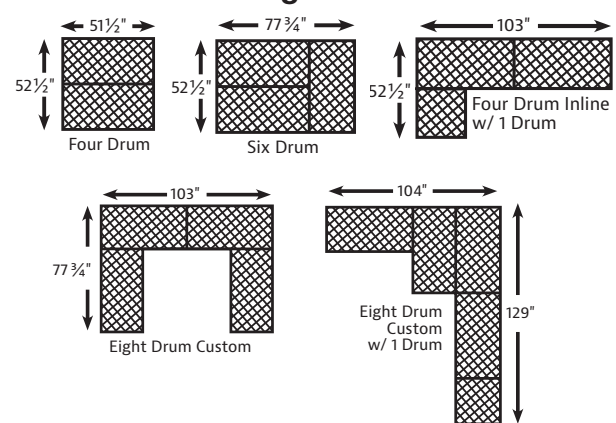

Create your own spill control system

Eagle Spill Containment Platforms are a modular solution for drum filling and dispensing operations. Combine platforms to create a customized spill control system to accommodate drum quantity and space needs—the system can expand as your capacity needs grow. For applications where a continuous sump is required, the optional Sump-to-Sump™ Drain Kit joins platforms together for a compliant solution. Kit includes one pair rubber grommets and one PTFE transfer tube.

- Low-profile centers measure 6.5 in (166 mm) high for easy handling of drums
- Built-in U-channels easily connect platforms
- Seamless construction eliminates leaks
- High density polyethylene (HDPE) construction with lead-free UV protectant provides excellent chemical resistance and impact durability for long life
- Removable HDPE flat top grates for simplified cleaning
- Forklift pockets on most models for easy relocation
- Black models and grates made with 100% recycled HDPE
- All models are EPA compliant and support SPCC as standalone or after sump connection
- Load and unload heavy drums with ease using optional ramp with anti-skid diamond pattern—use with most platform sizes

Sump-to-Sump™ drain kit	—	28800

Did you know?

According to EPA 40 CFR Part 264.175, containment systems must have sufficient capacity to contain 10% of the volume of containers or the volume of the largest container, whichever is greater.
