

How Does **POLYMATRx** Work?

PROFESSIONAL GRADE PERFORMANCE

POLYMATRx is a blend of several acrylic resins that, together, have a remarkable effect on the performance of standard acrylic/latex paint. By increasing durability, elasticity, and color-stability, POLYMATRx makes your paint up to **7X** more resilient to daily expansion and contraction cycles caused by the changing weather; the same cycle that destroys ordinary paint in 3-5 years! POLYMATRx gives you a “**just painted**” look that lasts for decades!

Elasticity

POLYMATRx IS ENGINEERED TO MOVE WITH THE SURFACE THROUGHOUT THE SEASONS FOR UNMATCHED CRACK PROTECTION.

Improves Color Stability

PREVENTS COLOR FADE - EVEN THE MOST DIFFICULT COLORS TO MAINTAIN OVERTIME, SUCH AS REDS AND YELLOWS, ARE PRESERVED WITHIN POLYMATRx'S UV-RESISTENT BARRIER.

Adhesion

HIGH POWERED RESIN BINDERS PROVIDE AN OUTSTANDING BOND TO THE SURFACE.

Durability

A MID-GRADE ACRYLIC PAINT MODIFIED WITH POLYMATRx WILL BE MORE DURABLE THAN ANY “TOP-OF-THE-LINE” EXTERIOR ACRYLIC PAINTS. PERIOD.

Superior “Hide” Qualities- 30-50% Increased Coverage!

THE UNIQUE RESINS IN POLYMATRx LEAVE A THICK BARRIER THAT DRAMATICALLY INCREASES SURFACE COVERAGE AND PROTECTION.

(SEE BARRIER EFFECT ILLUSTRATION ON RIGHT).

THE BARRIER EFFECT

1 COAT OF POLYMATRx PAINT= 2.5 COATS OF ORDINARY PAINT!

A: POLYMATRx-MODIFIED PAINT

B: ORIGINAL PAINT WITHOUT POLYMATRx

Displayed above are two pieces of raw wood, which are great examples for a demonstration like this: See how ordinary paint “soaks” into the surface, providing little-to-no barrier, therefore negatively effecting surface coverage and protection? However, the **SAME** paint with POLYMATRx not only soaks into the surface, but creates a consistent, durable barrier, even on the most porous of surfaces! It will continue to act as a shield to the harmful elements and UV rays. Which would you prefer to protect your investment?

IT'S SIMPLE

- 1.) ADD 1 QUART OF POLYMATRx TO EACH GALLON OF EXTERIOR ACRYLIC PAINT. MIX THOROUGHLY.
- 2.) FOLLOW STANDARD PAINT PRACTICE
