

WARRANTY

Santa Perpetua Mogoda, 16 June 2020

Dear Sirs

Our product "Espirpool Protect" is manufactured according to the international Quality norm ISO 3994, and it is also certified by the Spanish association of normalization AENOR, according to the specific protocol RP 01.38

We use in their manufacturing very resistant, high quality materials and therefore we can guarantee a long mean life.

Nevertheless, we have an insurance police issued by the prestigious company AXA, which covers all the damages in the installations as a consequence of a failure in the productions process of our products during twelve years after the manufacturing of the tube.

Yours faithfully

Javier Narváez

Quality Manager.
