

METAL IDENTIFICATION TAGS

Identifies these stain-causing metals:

E-Z CLOR® Metal Identification Tags are the most cost-effective and simplest way to detect the presence of stain-causing metals in pools & spas. Keep a tag attached to the pool or spa skimmer basket until it changes color, indicating when metals are present and action is needed.

Easy to use - just attach to the skimmer basket!

- Connect the Metal Identification Tag to the skimmer basket.
- After a few days, hold the Tag up to the sunlight and look for a color change.
- Any color will indicate if metals are present.
- Use the color chart to identify the stain-causing metal.

Use with E-Z CLOR® Super Metal Eliminator and Stain Preventer

After metal is identified, simply place an E-Z CLOR® Super Metal Eliminator & Stain Preventer in the pump basket to remove the stain-causing metals.
