

*When power and control are demanded from a subterranean fixture, you will not find a more versatile product than the RP. It can be configured to wall wash from tight spaces with a spread beam or provide a long narrow projection of light for a tall palm, even after installation. A family of accessories provides shape, color, and glare control for maximum effect.*

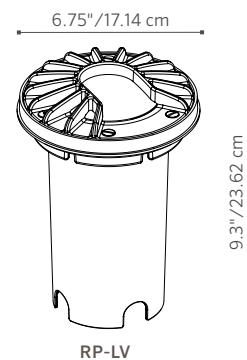

## RP: Well Light

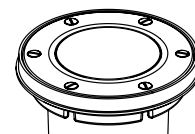

### *Go Underground*

For unobtrusive light control, choose the RP. From wall washing to targeted highlighting, this durable fixture can be incorporated into any plan for the perfect lighting effects.

*This lighting fixture is rated for transient landscape moisture-it is not an underwater light.*
