

The MD is specifically designed for down light applications. It features a specially engineered shield cover and knuckle assembly that keeps moisture out of the fixture. This allows for dependable performance year after year even in the harshest environments. It is designed to closely resemble our MU up light so designers can easily match an entire job with both fixtures.

MD: Down Light

Features and Flexibility Abound

With so many features and convenient wattage options, the MD is the go-to halogen down light solution for an array of applications.

MD: Down Light
