Equipment Pad 3"

Equipment Pads are available in various sizes and are rated for an impressive 4500 lbs. when the weight is evenly distributed across the pad surface.

Wide Application

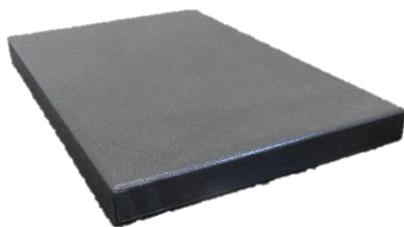

Ideal for ground support of air conditioning, refrigeration, or heat pump condensing units and other outdoor equipment. The equipment pad is of a lightweight and sturdy construction, very easy to transport, weather resistant and built to last.

Non-slip material

The non-slip textured surface helps prevent slipping injuries during installation and helps keep the condensing unit stable.

Ease of Installation

It is a lot easier to install when compared to a pre-manufactured cementitious pad or pouring a cement pad.

**Available Sizes****Equipment Pad**

Catalogue Number	Size (W" X L" X D")	Est. Allowable Load (lbs.*)	Pad Weight (lb. ea.)
GSI18383	18 X 38 X 3	4500	6
GSI24243	24 X 24 X 2	4500	5
GSI24303	24 X 24 X 3	4500	6
GSI24363	24 X 30 X 3	4500	7.5
GSI24483	24 X 36 X 3	4500	9.5
