## INTRODUCTION

**“Committed to Engineering and Manufacturing World Class Products.”**

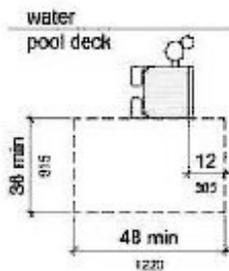

Global Pool Products is located in Mid-Michigan. Global Pool Products prides itself in manufacturing top-of-the-line quality aquatic pool equipment and products. Global Pool Products' key staff has a century of combined industry experience and we take pride in each and every product that we build. Our products are made in the United States. Global Pool Products uses only the finest materials and processes to provide our customers with the highest quality products while still maintaining a price competitive edge.

## ADA GUIDELINES FOR POOL LIFT PLACEMENT

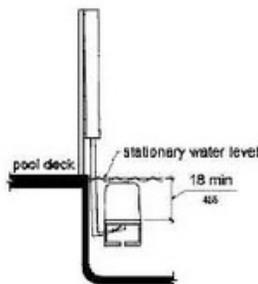

1. Pool Lift Location. Pool lifts shall be located where the water level does not exceed 48 inches (1220 mm).
2. Seat Location. In the raised position, the centerline of the seat shall be located over the deck and 16 inches (405 mm) minimum from the edge of the pool. The deck surface between the centerline of the seat and the pool edge shall have a slope not steeper than 1:48.

3. Clear Deck Space. On the side of the seat opposite the water, a clear deck space shall be provided parallel with the seat. The space shall be 36 inches (915 mm) wide minimum and shall extend forward 48 inches (1220 mm) minimum from a line located 12 inches (305 mm) behind the rear edge of the seat. The clear deck space shall have a slope not steeper than 1:48.

4. Submerged Depth. The lift shall be designed so that the seat will submerge to a water depth of 18 inches (455 mm) minimum below the stationary water level. To make sure the lift has enough clearance the lift should be installed at a location with 48" of water depth.

## 24 VOLT BATTERY SYSTEMS WITH CONTROLS

All of Global Pool Products' Superior/Proformance Series Lifts are equipped with a sealed 24 volt battery that is rechargeable. Along with a charging unit, hand held controller and control compartment. The 24 volt battery mounts into the control compartment and the battery simply snaps in. It can be released by lifting the lever built into the top of the battery. The battery should be charged for 5-8 hours prior to the 1st use.

The unit is operated by the 2 button easy to use controls. Turn the Red knob on the top of the unit clockwise to ensure it is in the up(On) position. Once unlocked, the arrow pointing down will lower the lift when depressed, the arrow that points up will raise the unit when depressed. If you hear the low battery indicator tone “Do Not Use the Lift” remove the battery from the unit and recharge the battery.

### **RECHARGING THE BATTERY:**

Remove battery from the unit by unclipping from the control compartment. When setting the battery down, place it horizontally as to avoid contacting the battery terminals with anything conductive, and damaging the battery. Place the battery in the charging unit. When the battery is charging the light will be illuminated red/orange, indicating charging on the wall plug. Once fully charged the charge light will turn green, indicating fully charged and ready for use in your Superior series pool lift.

## **PROFORMANCE SERIES POOL LIFT OPERATING INSTRUCTIONS**

Prior to using the Proformance Series Pool Lift perform a test run of the lift empty. Once that is completed and the lift is back to original position, make sure that the arm lifts are in the up position and the seatbelt is unbuckled, once acknowledged you are ready!

Once you are in the seat, buckle the seatbelt (make sure it is snug) and lower the arm rails. Before you attempt to operate the lift, make sure the pathway is clear from any obstacles.

Once you have the 2 button easy controls in your hand, press the arrow that specifies down, keep in mind you don't have to go to the bottom of the cycle, you can stop the lift whenever you deem comfortable to exit the lift. However when exiting the pool while on the lift, you should complete the cycle back to the top to have a completely safe exit from the pool.

Once submerged into the pool, unbuckle the seatbelt and raise the armrest and slide off of the seat. Once you are done with your pool activity, make sure the seat is lowered sufficiently to allow you too easily slide back into the chair. Once you are seated, buckle the seatbelt and make sure that it is snug, lower the armrest.

Next, to raise the lift chair out of the pool, make sure you press the button/arrow that represents up on the control. Apply continuous pressure until the lift comes to a complete stop at the end of the complete up cycle on the deck. You now can unbuckle the seatbelt and raise the arm rest and exit the unit.

## MAINTENANCE

Regular servicing will help prolong the life of your lift. Routine maintenance and cleaning is very important. The following is a routine maintenance you should follow.

### Daily

- o Check and charge battery if needed
- o Test for normal operations
- o Inspect your lift
- o Clean and dry the lift and seat with clean water
- o Cover lift after use

### Weekly

- o Overview Daily Checklist
- o Wipe away any surface rust with household spray cleaner
- o Clean tough stains with Scotchbrite pad and wipe clean

### Monthly

- o Inspects all connections, frame, seat, etc.
- o Clean battery connections
- o Clean metallic surfaces with a wax cleaner

The maintenance provision of the ADA states that "a public accommodation shall maintain in operable working condition those features of facilities and equipment that are required to be readily accessible to and usable by persons with disabilities."

## TROUBLESHOOTING GUIDE

### 1. Testing the Battery Charger:

- Use a voltmeter to test the battery charger. It should read between 27.5 and 30 volts.
- Ensure you are not using the control box port as a charger. The control box port will not charge the battery or operate the lift without a functional battery.

### 2. Testing the Battery:

- Use a voltmeter to test the battery. It should read between 26 and 28 volts.
- If the battery measures less than 26 volts, the system may exhibit slight movement but will not operate fully.
- If the battery cannot charge higher than 25 volts, replace the battery.

### 3. Checking the Emergency Stop Button:

- Verify that the red emergency stop button is in the up position.

### 4. Inspecting the Control Box:

- Check the tabs inside the control box to ensure they are lifted and making good contact with the battery.
- Ensure there is no visible damage and that the tabs are clean.

### 5. Connecting the Handset:

- Ensure the handset is plugged into the correct port on the right side, located under the control box. Push the plug all the way in so no gaps are visible.

### 6. Connecting the Actuator:

- Confirm that the actuator is securely plugged into the left port of the control box.
- For non-rotational lifts, the middle port is not used. For rotational lifts, the motor should be plugged into the middle port.

## TROUBLESHOOTING GUIDE

### **Important Note:**

Do not open the components of the lift for internal repairs. Most components are hardwired or sealed. Opening them will void the warranty and may cause further damage to the system.

### **7. Initial Diagnostic Checks:**

- After performing the initial checks, determine if the lift is making any sound when buttons are pressed on the handset.
  - If there is no sound: Replace the handset.
  - If the handset has been replaced and there is still no sound: Replace the control box.
  - If the lift makes a clicking sound but does not move: Replace the actuator.

### **8. Rotational Lift Specific Checks:**

- If the lift is not moving up and down or rotating left to right:
  - Switch the plugs under the control box.
  - If the lift still does not move up and down, replace the actuator.
  - If the lift is not rotating, replace the motor.

### **9. Sending Components for Testing:**

- If the issue persists and you are unable to identify the faulty component, you can send the system to us. We will test each component to determine the cause of the problem.

## Global Pool Products Pool Lift - Warranty Information

The **Commercial, Proformance, and Rotational** series lifts have a Lifetime Limited Warranty on the metal components of the frame, not including the powder coating process. The **Superior** and **Legend** series lifts have a 5 year structural limited warranty. Global Pool Products warrants to the original retail end user only products manufactured by Global Pool Products, when properly installed in accordance to the assembly and installation instructions, and when the equipment is properly used and maintained, be free from material defects and workmanship as stated below:

- Warranty starts from date of original purchase
- Metal structure (not including powder coat) – Lifetime Limited  
(**Commercial/Proformance/Rotational Series**)
- Metal structure (not including powder coat) 5 year limited structural warranty  
(**Superior/ Legend Series**)
- Actuator, Battery, and Controls – 2 years from date of purchase then 3 years prorated
- Actuator, Battery, and Controls – 3 years 60% coverage (Customer is responsible for 40% of replacement cost)
- Actuator, Battery, and Controls – 4 years 50% coverage (Customer is responsible for 50% of replacement cost)
- Actuator, Battery, and Controls – 5 years 40% coverage (Customer is responsible for 60% of replacement cost)

*This warranty does not cover damages to **ANY** of our lifts due to accident, abuse, negligence, misuse, damage by improper use of chemicals, fading, ice damage, fire, rust beyond structural damage( does not cover cosmetic rust), exceeding the weight capacity for model purchased, failure to install or to assemble the product in accordance with the installation and assembly instructions, normal wear and tear from day to day use, not maintained properly, if unit is altered or repaired without written approval of Global Pool Products – All Warranties are Void.*

To commence the warranty claim process of a Global Pool Products product, in writing provide place of purchase along with the product name and description, date of installation and a detailed description of the defect, along with a photo of the entire product and claimed defect. Prior to a 30-day period after receiving the written warranty claim by Global Pool Products and barring any unforeseen delays the claimant will be notified of Global Pool Product's decision regarding the claim.

If the request made by Global Pool Products for the product to be returned to its factory or distributor of choice for inspection and/or repair, purchaser will be liable for "Freight Prepaid". Global Pool Products at its option will replace or repair the defective item and deliver the repaired product or replacement to the buyer of the product, freight prepaid by the purchaser to the destination on file in regards to the original order. Parts and Products returned for replacement to Global Pool Products shall remain the property of Global Pool Products under this limited warranty.

A new warranty period shall not be established for any repaired or replaced products. Replaced or repaired products will remain under warranty only for the remainder of the original warranty period for the original product purchased. No person or organization is authorized to make any other specific or implied warranties on behalf of Global Pool Products.

THE WARRANTIES ARE IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, WHICH ARE HEREBY DISCLAIMED AND EXCLUDED, INCLUDING WITHOUT LIMITATION ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE.

IN NO EVENT SHALL GLOBAL POOL PRODUCTS BE LIABLE FOR ANY INCIDENTAL, CONSEQUENTIAL, INDIRECT, SPECIAL EXEMPLARY OR PUNITIVE DAMAGES OR LOST PROFITS FROM ANY BREACH OF THIS LIMITED WARRANTY. THE SOLE AND EXCLUSIVE REMEDY OF THIS WARRANTY IN REGARDS TO GLOBAL POOL PRODUCTS'S PRODUCT SHALL BE LIMITED TO REPLACEMENT OR REPAIR AT A GLOBAL POOL PRODUCTS'S FACILITY OR A DULY APPOINTED DISTRIBUTOR'S LOCATION OR AT A GLOBAL POOL PRODUCTS'S DESIGNATED LOCATION. IN NO EVENT SHALL GLOBAL POOL PRODUCTS LIABILITY EXCEED THE ENTIRE AMOUNT PAID TO GLOBAL POOL PRODUCTS BY THE ORIGINAL PURCHASER IN REGARDS TO THE DEFECTIVE OR FAILED PRODUCT.

NO REPRESENTATIVE OF GLOBAL POOL PRODUCTS SUCH AS AGENTS, DISTRIBUTORS AND DEALERS HAS THE AUTHORITY TO ALTER IN ANY FASHION THE TERMS OF THIS WARRANTY AND GLOBAL POOL PRODUCTS IS "NOT" RESPONSIBLE FOR REPRESENTATION, UNDERTAKING OR WARRANTY MADE BY ANY OTHER PERSON BEYOND THE WARRANTIES EXPRESSED SET FORTH IN THIS WARRANTY.

## Warranty Procedure

**Warranty Claims** shall be submitted to Global Pool Products by the distributor which originated the sale with Global Pool Products.

All RGA (Return Goods Authorization) documents shall be requested by and issued only to the distributor which originated the sale.

Global Pool Products shall determine warranty coverage validation and replacement parts or repair shall be directed to the distributor which originated the sale.

Warranty claims received from end users by Global Pool Products shall be re-directed to the distributor which originated the sale with Global Pool Products.

## ADA GUIDELINES FOR POOL LIFT PLACEMENT

•Pool Lift Location: Pool lifts shall be located where the water level does not exceed 48 inches (1220 mm).

Seat Location: In the raised position, the centerline of the seat shall be located over the deck and 16 inches (405 mm) minimum from the edge of the pool. The deck surface between the centerline of the seat and the pool edge shall have a slope not steeper than 1:48.

•Clear Deck Space. On the side of the seat opposite the water, a clear deck space shall be provided parallel with the seat. The space shall be 36 inches (915 mm) wide minimum and shall extend forward 48 inches (1220 mm) minimum from a line located 12 inches (305 mm) behind the rear edge of the seat. The clear deck space shall have a slope not steeper than 1:48.

•Submerged Depth. The lift shall be designed so that the seat will submerge to a water depth of 18 inches (465 mm) minimum below the stationary water level.

# PROFORMANCE SERIES – SLEEVE ANCHORING SYSTEM

Front of Anchor Sleeve must be 12" to 17" from the water's edge. Optimal placement is 14"  
Connect copper wire to the binding screw and then to your bonding grid.  
Cold Pins should be ½" rebar 6" to 8" long.  
NOTE: Make sure your anchor sleeve is level and square with your pool's edge.

## INSTALLATION STEPS

**Step 1:** Determine the location for installation (Make sure all ADA requirements are met).

\*\*\*NOTE: The installation of Global Pool Products' anchor systems are a guideline of minimum requirements. In some states or municipalities they may require additional steps due to their local codes or ordinances.\*\*\*

**Step 2:** Make sure that all the parts are present (Refer to the parts list)

1 - Anchor Sleeve w/ Base

1 - Binding screw

1 - Plastic cap

**Step 3:** At the determined location for installation, chalk out a 3' X 3' area prior to cutting out the concrete. (Refer to overview, the front of the Anchor Sleeve must be 12" to 17" from the water's edge and 6" deep). New Construction, the concrete must be 6" deep with a ½" reinforcing rod, minimum of an 18" grid.

**NOTE: Make sure all local codes and ordinances are met.**

**Step 4:** Once the 3' X 3' area is cut out, make sure you drill in the inner wall of all 4 sides of the area (refer to the section detail) for the purpose of cold pinning the new concrete to the old concrete. Use 1/2" rebar, 6" to 8" in length.

**Step 5:** Place the Anchor Sleeve in the cut out area, make sure that the front of the Anchor Sleeve is 12" to 17" from the water's edge. (refer to overview) A key element is to make sure that the Anchor Sleeve is level and square with the pool so that your Performance Series Lift sits properly on the deck.

**Step 6:** Bonding the unit – The binding screw is supplied with the Anchor Sleeve locate the binding screw, connect the binding screw to the bonding grid. NOTE: Make sure that all local codes and ordinances are met.

**Step 7:** Pouring your concrete, (make sure you cover the hole on your anchor sleeve with the plastic cap provided, so you don't get concrete in the sleeve) a minimum of 4,000 psi concrete with reinforcing rod. Also make sure that the top of the anchor sleeve is flush with the deck. Before you install your lift make sure you let the concrete set up for 48 hours.

**Step 8:** After the concrete has set for 48 hours, now it's time to install your lift. Place your Proformance Series Lift over the anchor sleeve, once you have completed the installation, please refer to User's Manual for a safe operation.

## **RETRO-FIT SLEEVE ANCHORING SYSTEM PERFORMANCE SERIES LIFT**

### PACKING LIST

- 1 - Anchor Sleeve w/ Base
- 1 - Binding screw
- 1 - Plastic Cap

## ADA GUIDELINES FOR POOL LIFT PLACEMENT

- Pool Lift Location: Pool lifts shall be located where the water level does not exceed 48 inches (1220 mm).  
 Seat Location: In the raised position, the centerline of the seat shall be located over the deck and 16 inches (405 mm) minimum from the edge of the pool. The deck surface between the centerline of the seat and the pool edge shall have a slope not steeper than 1:48.

- Clear Deck Space. On the side of the seat opposite the water, a clear deck space shall be provided parallel with the seat. The space shall be 36 inches (915 mm) wide minimum and shall extend forward 48 inches (1220 mm) minimum from a line located 12 inches (305 mm) behind the rear edge of the seat. The clear deck space shall have a slope not steeper than 1:48.

- Submerged Depth. The lift shall be designed so that the seat will submerge to a water depth of 18 inches (455 mm) minimum below the stationary water level.

Water's edge – Must be 12" to 17" in distance from the front of the anchor sleeve

Picture A

Front edge of Anchor Sleeve

Picture B

**STEP 1:** Locate the retro-fit anchoring sleeve (as shown above) picture A

- Once you determine where your lift is going to be located at your pool, place the anchor sleeve down so you can mark a circle around the base on the concrete where you will need to drill the hole. NOTE: From the water's edge to the front end of the Anchor sleeve must 12" to 17". See picture B

\*\*\*NOTE: The installation of Global Pool Products' anchor systems are a guideline of minimum requirements. In some states or municipalities they may require additional steps due to their local codes or ordinances.\*\*\*

Picture A

Front edge of anchor sleeve

Picture B

**Step 2:** You will need a 5" diameter core drilling bit.

- Make sure you have accurately marked your hole location to be drilled. After drilling your hole (picture A), it must be 6" deep and flat on the bottom of the hole (shown above).

Also Double check your measurements, they should be:

Place your anchor sleeve in the hole and make sure the front edge of the sleeve is 12" to 17" from the pools edge. Along with connecting to the bonding grid , ensure all local codes and ordinances are met. (picture B)

**STEP 3 :** Cementing the anchor sleeve in the concrete. Make sure your anchor is level and square.

- You will need 10 lbs of Quick dry Anchoring Cement (Commercial Grade Quikrete Exterior Use Anchoring Cement) to complete the installation. You can purchase at any hardware store in your area. Read the label and follow manufacturer's instructions.
- Start pouring into the hole evenly until you fill it up, make sure not to overfill the hole so that it does not create more work to scrap excess concrete off.
- Let the concrete set for 24hrs, sand the area with a sand stone to smooth the finish.
- Make sure the anchor sleeve is flush with the concrete.
- You are now ready to install your Proformance Series lift.

## Fixed Anchor Performance Series

Once you have completed the installation of your lift, locate the 3/8 bolt and secure it in the pre-drilled hole inside the anchor sleeve and tighten.

Your lift is now ready to be used.

## Optional Fixed Drop In Anchor Instructions for Proformance Series

Pre-drilled hole  
on the base of S-  
350 & P-375 Lift

After you have installed your square anchor, you are ready to install the optional fixed drop in anchor. Position the lift into square anchor. Locate the pre-drilled hole on the base of the lift. Now mark the concrete so you will know where to drill. Remove the lift from the anchor. You will need a 7/8" rock carbide drilling bit.

- Make sure you have accurately marked the hole location to be drilled. After drilling your hole it must be 2 1/2" deep.
- Clean hole with pressurized air or vacuum.
- Administer Epoxy into the hole prior to inserting the drop in anchor.
- Drive the anchor flush with the surface of the concrete .
- Expand the anchor with the setting tool (provided). Anchor is properly expanded when shoulder of the setting tool is flush with the top of the anchor. Position the lift back on the square anchor. Insert drop in anchor bolt and tighten. Fix your square anchor in place with the 3/8" bolt inside the anchor sleeve.

Setting tool  
shown

3/8" bolt inside  
anchor sleeve

**CUSTOM SEAT INSTALLATION MANUAL  
C, P, & S Series Lifts**

## **CUSTOM SEAT INSTALLATION MANUAL**

### **PARTS LIST**

- 1 - Custom Seat
- 1 - Foot Rest
- 2 - Arm Rests
- 1 - Seat Belt & Buckle
- 1 - ½" x 2 ¾" Securing Bolt
- 3 - 5/16 x 3" Attaching Pin with lock nut
- 1 - 5/16 x 2" Foot Rest attaching bolt w/ nut
- 1 - 2" Round cap
- 1 - 1" Round cap

## INSTALLATION STEPS

Picture A

### **Step 1:**

Unpack your custom seat (picture A). Loose Items will consist of:

- Foot Rest and Tube
- ½" x 3" Bolt w/ lock nut
- 5/16" x 2 ¾" Bolt with Lock nut

## INSTALLATION STEPS

Picture A

Picture B

### Step 2:

Align your custom seat (Picture A), slide the lower seat tube into the upper seat tube.

### Step 3:

Once you have the seat in place, take your  $\frac{1}{2}$ " x 3" bolt and slide it through the pre-drilled holes (Picture B). Once you have inserted the bolt all the way through, apply the locking nut (supplied) and tighten down.

---

### Step 4:

Locate the  $\frac{5}{16}$  x 3" securing bolt (supplied), insert the bolt through the pre-drilled Seat and tube holes (As shown). Once you have the bolt inserted, secure the installation with the lock nut that is provided and tighten down.

## INSTALLATION STEPS FOOT REST

Picture A

Picture B

### **Step 5:**

In picture A, slide the foot tube through the foot rest sleeve and line the hole to the slot. There are 2 holes to choose from depending on your preference for the height of the footrest. In picture B, locate the 5/16" x 2" bolt and insert into the pre-drilled holes to secure the foot rest to the lift. Place the lock nut on the bolt and tighten down. Once that is complete, you are ready to enjoy your Global Pool Products pool lift.
