## Heavy Duty Long Reach Pruner

### Heavy Duty Pruner with More Cutting Capacity and Improved Durability!

#### Bigger Cuts

The blade has a cutting capacity of 1.0 inches

#### High Carbon Steel Blade

Specially heat treated to keep the edge an extra long time. Blade is replaceable.

#### Branch Hook

Specially Designed branch hook is designed to remove cut branches. The hook is separated from blade for maximum strength and efficiency.

#### Improved Durability

Vast improvements to the internal system and design lead to longer lasting components and far fewer broken or lost parts.

#### Sliding Support Grip

Gives you more control of the pruner, especially at the longer lengths! The grip is adjustable. Just turn the white dial nut to slide to the spot most comfortable for you and retighten.

#### Rotating Handle

The handle rotates 90 so you can get the perfect angle for the cut. Move the blade, not your hand!

#### Strong and Lightweight Pipe

The pipe is made with ultra lightweight aluminum alloy for strength while still being lightweight and maneuverable.

LA-NASH-2.0

## NASH Heavy Duty Long Reach Pruners

Heavy Duty Long Reach Pruners that offer greater cutting capacity and greater durability, the two things requested most by the market. Made in JAPAN.
