

8mm Shock Pad

8 mm thick shock pad is perfect for putting greens. Easy to install, it reduces the amount of infill and improves consistent ball roll for putting and durability for chip shots.

Shock Pad Specifications:

Density: 50 kg/m³

Thickness: 8mm

Roll size: 5' x 200'

Chemically Closed-Cell Polyethylene Foam is perfect for padding. Low moisture permeability and high buoyancy combined with a smooth, delicate feel and superior physical and chemical properties, the foam is the ideal **shock-absorber**.

Advantages of Closed-Cell XPE Foam

- Lightweight. Easy to Install. No glue.
- Shatterproof
- Non-dusting
- Excellent chemical and grease resistance
- Superb strength and tear resistance
- Low water absorption
- Excellent strength and shock absorption
- Impervious to mold, bacteria and mildew
- Nontoxic
