

HASA SMALL CHLORINATING TABLETS

CONTROLS ALGAE AND BACTERIA IN POOL WATER

These **HASA SMALL CHLORINATING TABLETS** were manufactured for use in erosion type feeders where they are slowly dissolved as the water flows over the tablets. Do not throw **HASA SMALL CHLORINATING TABLETS** directly into the water. Do not place them in the skimmer. Contact with concrete or vinyl walls may result in staining.

DIRECTIONS FOR USE:

If the directions for use supplied with the chlorinator are missing or unclear, try 12 **HASA SMALL CHLORINATING TABLETS** per 10,000 gallons of pool water each 7-10 days. Twenty-four (24) hours after filling the chlorinator, check the available chlorine with a test kit. If

necessary, adjust the feed rate so the available chlorine is maintained between 1.5-3.0 ppm. If you are unable to maintain a residual after 3 days, superchlorinate. Superchlorinate and reconnect feeder when residual is below 3.0 ppm. Readjust feed rate to maintain a 1.5-3.0 ppm and the pH is between 7.2-7.6.

SUPERCHLORINATION: The addition of several times the normal amount of chlorinating chemical, is necessary to establish an initial chlorine residual in a freshly filled pool, every 7-10 days during the swimming season, and after special problems, such as wind storms, rain, and unusually hot weather. Fast dissolving **HASA Chlorinating Granules** or **HASA Sani-Clor** should be used. Follow superchlorination or "shock" directions on the label of the product selected.

Up to 90% of the chlorine residual may be lost from ultraviolet radiation from the sun. This loss can be greatly reduced when the pool is stabilized with **HASA Pool Conditioner**. See directions on the **Hasa Pool Conditioner Label**.

Maintain pH between 7.2-7.6. Use a reliable test kit with fresh solutions to check both pH and the chlorine residual.

HASA SMALL CHLORINATING TABLETS are 90% available chlorine.

INGREDIENTS:

ACTIVE INGREDIENTS: Trichloro-s-Triazinetrione99.00%
INERT INGREDIENTS:.....1.00%
TOTAL INGREDIENTS:.....100.00%

AVAILABLE PACKAGING:

HASA SMALL CHLORINATING TABLETS are available in 4#, 10#, 20#, 40#, 100#, and 300# sizes.
