

HELPFUL INFORMATION REGARDING THE SINGLE POLE SUPPORT SYSTEM

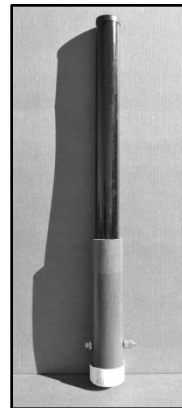

1. Install the single pole deck anchor (not included) per the manufacturer's instructions
2. Align the notches at the bottom of the support pole with the bolt or rod in the anchor
3. If you have a schedule 80 PVC anchor use the 4 included wobble wedges to plumb the pole inside the anchor, place the 4 wedges equally spaced between the pole and the anchor to help remove play between the pole and anchor show below
4. If you have a schedule 40 PVC anchor, you **may** be able to utilize the included pole adapter.
 - Slide the adapter down from the **TOP** of the pole so it fits inside the schedule 40 anchor
 - Once in place use the included wobble wedges as described above to plumb the pole and help remove play between the adapter and the pole
5. Assemble the rest of the basketball support system per the manufacturer's instructions
6. Attach your backboard and rim to the support system per the manufacturer's instructions
7. For warranty information go to www.interfab.com/warranty to view or download warranty
