

HYDRO-RAIN®

COMMERCIAL SPRAY HEADS

seal

- Five sealing surfaces prevent leaks.
- Co-molded with a core of ridged plastic, standing up to heavy use and corrosives.
- Pressure activated seal, sealing tight to the cap and riser.

filter

- More robust.
- Improved surface area to catch debris.

optional adjustable pressure regulator

- The pressure regulator adjusts from 30 psi to 40 psi with the turn of a screwdriver.
- All pressure regulated models are EPA WaterSense® Certified and legal in California.

Hydro-Seal

- Check valve eliminates low head drainage and speeds initial pop-up.

cap

- Thicker cap.
- Superior threads.

body

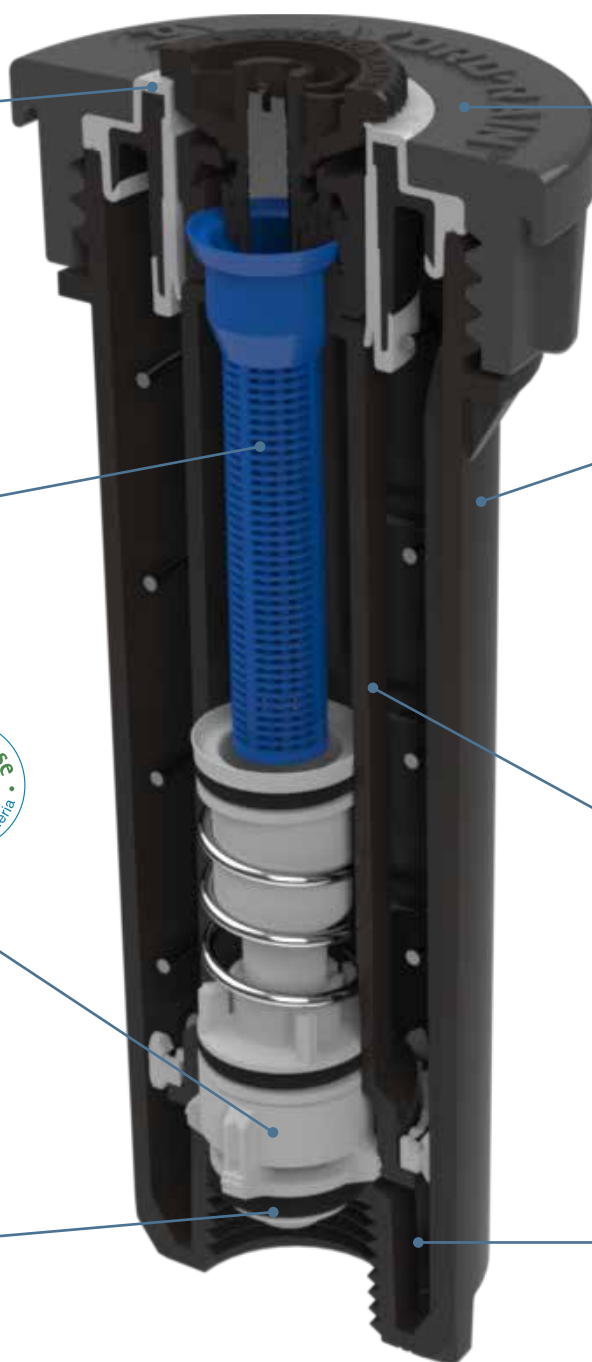

- Stronger body.
- Buttresses added under the cap for support and grip.
- UV protected.

riser

- Engineered to fit all major manufacturers' female threaded nozzles.

debris catchers

- Traps debris, preventing wear and tear.

Ideal for residential and commercial landscapes

Non-potable—color coded for reclaimed water.

Pressure Regulated—meets or exceeds standards for states that require pressure regulated spray bodies.

California

Colorado

Washington

Vermont

Hawaii

Massachusetts

Washington D.C.

Pressure regulated models feature a

Patented Adjustable Pressure Regulator

Why Adjustable? Fixed nozzles work best at 30 psi, rotary nozzles work best at higher psi. One head, for all pressure needs.

The Adjustable Pressure Regulator comes factory set at 30 psi. It easily adjusts to 40 psi by inserting a screwdriver into the bottom of the head and turning counter-clockwise until it clicks into place.

For heads that have already been installed, the Adjustable Pressure Regulator can also be accessed from the top, through the stem.

Pressure Regulated spray heads are easily identifiable by a prominent PR marking on the cap.

3 Year Warranty
