

PolyAspar VXC Clear

High Gloss Polyaspartic Clear Coating

Item #180

USE:

PolyAspar VXC Clear (180) is a two component, high gloss, UV stable, polyaspartic floor coating for use in industrial and commercial facilities and is designed to be used over existing epoxy coatings, pigmented and chip embedded. Suitable for both interior and exterior applications.

DESCRIPTION:

PolyAspar VXC Clear is a two-component, aliphatic, solvent-based, crystal clear polyaspartic system. At 85% solids, **PolyAspar VXC Clear** dries to a very hard, chemical resistant, and tire mark resistant, high gloss finish. **PolyAspar VXC Clear** can be used over existing epoxy coatings, pigmented and chip embedded, to obtain a clear, non-yellowing, long lasting coating. **PolyAspar VXC Clear** is ideal for use in garage and restaurant floors, service areas, and many other surfaces; can also be used on counter tops, wood and laminates. **PolyAspar VXC Clear** has UV protection, allowing outdoors applications without yellowing.

FEATURES & BENEFITS:

NON-YELLOWING/NON-FADING
VERY HIGH GLOSS
HIGH SOLIDS, LOW V.O.C.
EXCELLENT ADHESION
GREAT FLOW & LEVELING

RETURN TO USE IN APPROX. 8 HOURS
EASY MAINTENANCE
HARD, TOUGH, FLEXIBLE SURFACE FINISH
EXCELLENT CHEMICAL & STAIN RESISTANCE
HIGH TEMPERATURE & TRAFFIC RESISTANCE

CHARACTERISTICS AND TECHNICAL DATA

Weight/Gallon.....	8.8 lbs
% Solids (combined).....	84% ± 1
Gloss.....	High gloss
Coverage/Gallons.....	125—175 sq. ft. per gal. @ 4 mils
Clean Up.....	Toluene, Acetone, or Xylene
Dry to touch.....	1-2 hours
Light traffic.....	4 hours
Return to use.....	8 hours
Vehicular Traffic...	24 hours
Full cure.....	5 days
Pot life.....	40 mins @ 80°F
Shelf Life.....	1 year (closed container)
V.O.C (combined).....	< 170 grams/liter
Minimum recoat.....	1.5 hours
Maximum recoat.....	24 hours
Installation Surface Temp.....	30°F - 110°F
QUV ASTM D-4587.....	No change @ >2000 hrs.

SURFACE PREPARATION:

The concrete surface must be free of all dirt, grease, oil, fats, and other contamination. Remove surface contamination by cleaning with *Total Klean Concentrated Degreaser (700)*, detergent, or other suitable cleaner. Rinse thoroughly with clean, fresh water and allow the surface to dry completely.

New concrete should be allowed to cure for a minimum of 28 days. The concrete must be structurally sound, dry, and free of grease, oils, dust, curing compounds and other coatings or contaminants. Previously coated concrete must be in good condition with the existing coating properly adhering to the concrete. The existing coating must also be etched to create a slight surface profile. Surface must be tested for relative humidity and or rising moisture vapor emission. Rates must not exceed 3 lb. per 1,000 sq. ft. over a 24-hour period as measured by calcium chloride test method ASTM F-1869 or RH in slab must not exceed 75% as tested per ASTM F2170. If it is determined that moisture vapor emission rate is unacceptable, a moisture vapor barrier is required. The preferred method of surface preparation is to mechanically abrade the floor by diamond grinding to achieve a final 80–120 grit finish, reference profile CSP-2 according to ICRI. Remove all sanding dust by vacuum or broom.

PolyAspar VXC Clear

High Gloss Polyaspartic Clear Coating

Item #180

APPLICATION INSTRUCTIONS:

PolyAspar VXC Clear contains a Part A and Part B that must be mixed together. Only use the correct ratio of 1 Part A and 1 Part B as purchased. Pour Part A and Part B into a clean, dry container and mechanically mix gently to avoid creating air bubbles. Mix for 2-3 minutes with a drill and product is ready to apply. **PolyAspar VXC Clear** cannot be applied over clear acrylics and clear water based systems. Always test product in an obscure area to ensure desired results for adhesion and finish.

1. Apply at a spread rate of 125–250 sq. ft. per gal. to yield 4–8 wet film thickness using a squeegee and back-roll with a non-shedding 3/8" nap roller. Note: The use of a flat or notched squeegees to spread **PolyAspar VXC Clear** prior to back rolling depends on the thickness of your coating system. Thinner coatings work best with flat squeegees and thicker coating systems with a notched squeegee.
2. This material will cure faster with exposure to moisture in the air, and high temperature.
3. Applying thicker than recommended, and allowing material to pool, or rolling into late, may leave a white, hazy appearance.
4. Allow **PolyAspar VXC Clear** to level in the surface. Back roll any material that is puddled on the surface. A second coat may be desired.
5. The second coat can follow after approximately 1 hour of dry time, depending upon weather and sun exposure. It is the sole responsibility of the applicator to determine whether a non-skid additive is appropriate for the job.

ALWAYS APPLY A TEST AREA FOR BEST RESULTS.

COVERAGE:

Coverage rates will vary depending on substrate, textures, porosity, and application methods.

125—300 sq ft per gallon

250—600 sq ft per kit

CLEAN UP & STORAGE:

Clean up mixing and application equipment immediately after use. Use toluene, acetone or xylene; do not use Alcohol or water. Follow solvent manufacturer's safety instructions. Use safety gear when handling solvents. Be sure to follow all local, state and federal regulations when disposing of materials. Product must be kept in its original, unopened and tightly sealed container. Store in a dry and well ventilated place with controlled temperature (50°F to 90°F). Keep sheltered from weather and direct sunlight. In proper storage conditions, the product's shelf life is 12 months following production (see date on packaging).

PRECAUTIONS:

Use Gloves and Safety Glasses when handling this product. Eye Contact: May irritate eyes. If in eyes, flush with water for at least 10 minutes. Do not rub eyes. Remove contact lenses if worn. Inhalation: Use a NIOSH approved respirator for continuous use. Use with adequate ventilation. Ingestion: If swallowed, DO NOT induce vomiting. Seek medical attention immediately. Skin: Avoid prolonged contact with skin. Wash hands immediately with water and soap if in contact with hands. If irritation develops in eyes or skin, call a Doctor. Please understand the label instructions and Safety Data Sheets before using this product.

PROPOSITION 65 (CALIFORNIA): This product contains a chemical known to the state of California to cause developmental toxicity. See SDS for more information.

WARNING! If you scrape, sand, or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH-approved respirator to control lead exposure. Clean up carefully with HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.
