Simplify Schedules
with Our All-Weather Wi-Fi Control

Take control of pool equipment schedules with the PE700 Series Wireless Electronic Time Switch from Intermatic. Our simple wireless solution allows pool owners to turn pool pumps, submersible lighting, auxiliary equipment, and more ON and OFF via the Intermatic Connect app or voice command for added convenience and efficiency.

Users can also use the PE700 Series to set 7-Day ON/OFF schedules with built-in Astronomic and Daylight Saving Time adjustment.
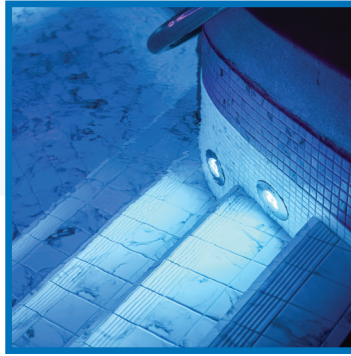

Features & Benefits

- **Versatile Control –** Create automatic ON/OFF schedules for connected pool equipment and manually override/ update from anywhere via the Connect app

- **Rugged Performance –** Robust environmental rating of 158° F allows the control to perform in even the hottest climates, from the deserts of Arizona to sunny Florida

- **Simple Retrofit –** Knockout locations and sizes designed equivalently to legacy Intermatic Time Switch enclosures

- **Flexible Scheduling –** 7-Day scheduling options with Daylight Saving Time and Astronomic capabilities

- **Remote Access –** Once connected to a Wi-Fi network, the PE700 Series can be accessed via the Intermatic Connect app from any location

- **Auto Voltage –** Automatic input voltage selection from 120 to 277 VAC, 50/60 Hz

- **Override Inputs –** Remotely extend or override active schedules at any time with a switch, photocontrol or presence sensor

- **Configurable Relay Outputs –** Relay 1 and 2 can be configured to function as independent SPDT 120 VAC circuits or work together as a DPDT switch for 240 VAC loads

- **Service Mode –** Includes optional timed stop or timed run feature. Locks external users out from controlling connected loads remotely

- **Wi-Fi Range –** Offers best-in-class wireless range of up to 180 ft. (direct line of sight)

PE Series Wi-Fi Controllers bring simplicity
and reliability to a wide range of pool and spa applications

**ON/OFF
Pump Control**

**Submersible
Lighting Control**

**General Purpose
Auxiliary Loads**

Remote Input
Enhance functionality by wiring a photocontrol/presence sensor (120-277 VAC) directly to the PE700 Series control, then apply an override to the chosen circuits. This means that the override can handle much larger loads as it now allows the control to handle the load directly while there is very little draw on the override itself.
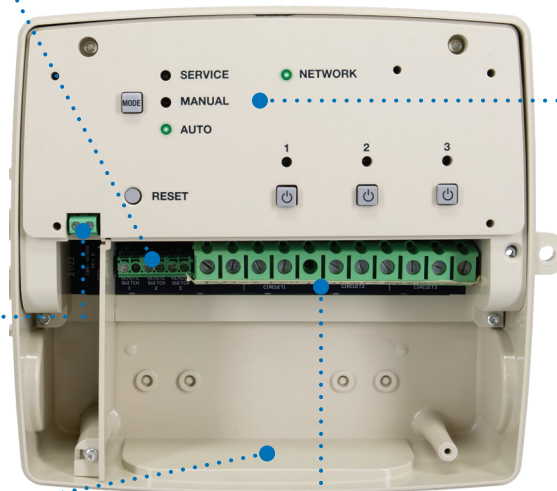

Freeze Protection
Separate freeze protection accessory available (Part number PE700-FP)

Simple Retrofit
PE Series enclosure knockout sizes and locations are the same as legacy Intermatic enclosures, making it easy to upgrade

PE733P
3-Circuit (As shown)

LED Indicators
LED indicators give users a visual cue to indicate the device's current state and connection status

Independent Relay State
Indicator light will be active when Normally Open relay is energized

Connection Status:
Solid green = connected
Solid red = disconnected
Flashing green = attempting to connect

2x or 3x SPDT Relays
Configurable for DPDT applications with an additional SPDT available; device includes up to 3 line-voltage remote inputs
(PE723P 2-Circuit, PE733P 3-Circuit)
