

NEW ***U-Phase™ Wire Marker***

Gardner Bender's new U-Phase™ Wire Marker takes simplicity and efficiency to a whole new level. Traditionally phasing or color coding wires involved wrapping the wires in colored tape, but now with the U-Phase™ you are able to simply slide the patented designed marker tip across the wire. The U-Phase™ is perfect for phasing of electrical panels, color coding, identifying and wiring circuits, marking computer cables and countless other applications making it an essential tool for any electrician.

FEATURES:

- Perfect for phasing and color coding electrical panel
- Permanent and fast drying
- Mark up 6AWG electrical, CAT-5 wire & more
- Durable and flexible

Features:

- Patented U-shaped brush fits around and marks the wire.
- Valve activated tip keeps paint fresh.
- Marking Temp Range: 0° to 110° Fahrenheit (-18° to 44° C).
- Industry standard colors: Blue, Green, White, Red.
- Small lightweight marker design allows for easy storage.

Benefits:

- 675' of usage versus the standard 66' of a roll of vinyl tape.
- Fast and easy to apply, saves time and money.
- Marks up to #6 AWG wire with highly visible quick-drying permanent paint.
- Paint resists abrasion, moisture, dirt, oil and UV light.
- Conforms to ASTM D 4236.
