

AUTOMATIC HYDRAULIC **CLEANERS**

Filtration Systems (Min. 0.75HP)

Like the **Dipper™**, the **Dipper Max™** automatic pool cleaner is reliable and silent due to its diaphragm technology. In addition, it includes extra hose length plus a deflector ring to ensure smooth navigation around pool steps and more complex pool shapes. The **Dipper Max™** is capable of climbing walls and vacuuming both the pool floor and walls.

DipperMax™

K915CBX - Dealer E/B net: \$109.93 (STOCK)

Features:

- Membrane technology ensures silent operation with optimum cleaning efficiency.
- Lightweight design enables it to clean rapidly across the pool floor.
- The membrane system ensures a smooth passage of debris.
- Pressure regulator to adjust to ideal suction.
- Low maintenance required due to just one moving part.
- Large circular deflector to navigate around steps, ladders, and corners even in the most complex pools.
- Climbs walls.
- Recommended for: in-ground & above-ground pools up to 7.3m / 24ft (excluding soft wall pools)
- Min. system flow rate: 1,600gal/h / 6m³/h
- Min. pump power: 0.75HP / 560W
- Also suitable for pools with an inclined bottom

Accessories:

- Includes 9.75m / 32ft of standard hoses
- Compatible with leaf canister K918CBX (not included)
