

ColorQ PRO 6 Handheld Photometer

ColorQ PRO 6 Handheld Photometer

Order Code 2072

The **ColorQ PRO 6** handheld pool and spa professional photometer measures Free Chlorine [DPD], Total Chlorine [DPD], Bromine [DPD], pH, Alkalinity, Calcium Hardness and Cyanuric Acid directly on a digital display. The handheld meter is easy to use and features economical liquid reagents that measure 144 tests per 30 mL size bottle for Free Chlorine, Total Chlorine, Bromine, pH and Alkalinity. The Calcium Hardness and Cyanuric Acid tests are measured by using one TesTabs® tablet per test with 100 tablets included with the kit. The ColorQ eliminates the need to visually determine slight color variations thus taking the guesswork out of poolside water analysis. The photometer, testing reagents and photo-diagrammatic tri-lingual instructions [English, Spanish, French] are packaged in a convenient carrying case for on-site testing.

ColorQ PRO 6	Free Chlorine	Total Chlorine	Bromine*	pH	Total Alkalinity	Calcium Hardness	Cyanuric Acid
Test Ranges	0-10	0-10	0-22	6.5-8.5	0-250	0-400	0-125
Number of Tests included with kit	144	144	144*	144	144	100	100

* Uses the Chlorine [DPD] reagent set.

Water Testing Leader Since 1919!

Insta-TEST® Iron Test Strips

Insta-TEST® Iron Test Strip

Order Code 2935-G (bottle) or 2935-G-12 (case)

The new one-dip Insta-TEST Iron test strip formula eliminates the need to pre-treat the sample with a reduction tablet prior to measuring Iron with a test strip. The Iron strip makes the testing process simpler with just one dip of the strip into a pool or spa before matching the reaction to a color chart [0-5.0 ppm] on the bottle. This one of a kind new test strip offers stable color development with very distinct colors. There are 25 strips packaged in a unique, hinged, waterproof PopTop bottle with a desiccant liner that protects the test strips from moisture intrusion. The product can be purchased as a 12-pack case using Code 2935-G-12 or individual bottle using Code 2935-G.

NEW!

Insta-TEST® Copper & Iron Test Strip Kit

Order Code 2994 (kit) or 2994-6 (case)

Copper & Iron Test Strip Kit measures Copper levels from 0-3.0 ppm and Iron levels from 0-5.0 ppm. The new one-dip Insta-TEST Iron test strip formula eliminates the need to pre-treat the sample with a reduction tablet prior to measuring Iron with a test strip. The Iron strip makes the testing process simpler with just one dip of the strip into a pool or spa before matching the reaction to a color chart on the bottle. There are 25 strips packaged in a unique, hinged, waterproof PopTop bottle with a desiccant liner that protects the test strips from moisture intrusion. The product can be purchased as a 6-pack case using Code 2994-6 or individual kit using Code 2994.
