

MEGATHERM® HIGH PERFORMANCE GAS FIRED COMMERCIAL POOL HEATER

Powerful, efficient, and reliable, MegaTherm pool heaters are designed for commercial, institutional and large residential pools where economical performance and rapid heat-up are required. Available in indoor and outdoor models, with twenty-two sizes from 500,000 to 5,000,000 BTU/h to precisely match any heating requirement.

MegaTherm heaters are designed to deliver efficiencies as high as 82%. Integral finned copper tubes are rolled directly into the headers, and conformal heat exchanger baffles and an eight-fins-per-inch tubing configuration maximize combustion heat extraction. We've also designed the MegaTherm

heater to be simple to service. Heat exchanger header covers are field-removable for complete inspection of tubing and header passages, and the heat exchanger is replaceable without disassembly of the burners or combustion chamber.

MegaTherm heaters are design certified to the ANSI® Z21.56 Standard for Gas-Fired Pool Heaters. (Outdoor 500-1825 units are certified for use without the addition of a draft diverter or external vent. Indoor units incorporate a built-in draft diverter and require only vent piping.) Salt water models (500-1825) are available with cupronickel alloy heat exchanger tubes and header covers.

STANDARD FEATURES

- Reliable operation on natural or propane gas.
- Electronic ignition.
- Built-in draft diverter (indoor models) simplifies installation.
- Flow switch standard on all models.
- Integral pump assures proper water flow (Models 500-1825).
- Automatic gas valve.
- Stainless steel burners, with slide-out burner tray for easy maintenance and long life (Models 500-1825).
- Galvanized steel jacket with acrylic finish for strength and durability.
- High temperature refractory firebox liner to 2000° F for greater efficiency.
- Easy-to-service header flanges.
- Corrosion-resistant glass-lined headers.
- Integral lined copper tube heat exchanger for higher efficiency.
- Electronic temperature control for accuracy. (Models 500-1825; model configuration varies slightly by size.)
- One-year limited warranty. See warranty for details.

MEGATHERM®

HIGH PERFORMANCE GAS FIRED COMMERCIAL POOL HEATER

Dimensional and Sizing Data

Indoor
Sizes 500 – 1825

Indoor
Sizes 2000 – 5000

FOR INDOOR POOLS MODEL I

1. Calculate the surface area of the pool in square feet.
2. Refer to the selection chart for either an indoor or outdoor heater.
3. Find the closest square footage in the 10° F (6° C) Temperature Difference column, and the heater models which correspond to it. For normal conditions, Pentair recommends using the 10° F Temperature Difference columns; this will provide a temperature increase of approximately 6° F per 24 hour period.

Temperature Difference

NOTES:

1. Input and output must be derated 4% per 1000 feet above sea level when installed above 2000 feet altitude.
2. Dimensions are nominal.
3. Integral pump included on sizes 500-1825.

FOR OUTDOOR POOLS MODEL E

1. Determine the difference between the desired pool temperature and the average air temperature during the coldest month in which the pool will be used (referred to in the chart below as "Temperature Difference").
2. Calculate the surface area of the pool.
3. Refer to the selection chart. Listed are the maximum pool surface areas for each heater model with typical temperature differences. Make the appropriate selection from the chart.

NOTES: For high altitude pools, reduce the surface area figures shown in the charts by 4% for each 1000 ft. above sea level. (No derating is necessary up to 2000 ft. above sea level.)

Sizing for outdoor pools is based on 3 1/2 mph average wind.

2. Dimensions are nominal.
3. Integral pump included on sizes 500-1825.

MEGATHERM®

HIGH PERFORMANCE GAS FIRED COMMERCIAL POOL HEATER

THE PERFECT COMBINATION OF ACCURATE CONTROL, EFFICIENCY, AND LONG LIFE

The MegaTherm heater is packed with performance features designed specifically for the commercial, institutional, and large residential pool market. The primary/secondary pump and control (Models 500–1825) feature an electronic controller with a solid state sensor and adjustable differential for accurate temperature control. Inlet water is preheated to eliminate condensation, and a constant velocity in the heat exchanger increases tube life. The diverter valve has been eliminated in the pool circulation line, resulting in lower installation and operating costs. And, inlet and outlet thermometers with $\pm 1\%$ accuracy allow precise set-up and temperature rise monitoring.

Additional Design Advantages Include:

- Control system includes automatic temperature control, temperature limit, gas pressure regulator, redundant electric gas valve, water flow sensing, electronic flame safety supervision and manual gas shut-off valve. The standard control system operates on 24 VAC with a 120 VAC power supply. Standard units are intermittent (spark) ignition.
- Working pressure of 160 psi complies with Section IV of the ASME® Boiler and Pressure Vessel Code. Units are registered with the National Board of Boiler and Pressure Vessel Inspectors.
- Pressure relief valve is ASME rated and is selected to provide discharge capacity in excess of unit heating input.
- Combustion chamber is cast refractory with a 2000° F (1093° C) working temperature.
- Burners are atmospheric type constructed of AISI alloy 430 (models 500–1825) or AISI 439 (models 2000–5000) stainless steel.
- Chassis and jacket parts are of galvanized steel meeting ASTM® Standard for G90 coating. Exterior is finished with acrylic paint, thermoset at 325° F (163° C).
- Integral flow control valve on models 2000–5000 accepts flows up to 300 GPM.

MT2200EN18CCAC	Outdoor, Spark Ignition, Less Pump, Cl-Cu HX, Std. Unit, Nat. Gas
MT2800EN18CCAC	Outdoor, Spark Ignition, Less Pump, Cl-Cu HX, Std. Unit, Nat. Gas
MT3200EN18CCAC	Outdoor, Spark Ignition, Less Pump, Cl-Cu HX, Std. Unit, Nat. Gas
MT3600EN18CCAC	Outdoor, Spark Ignition, Less Pump, Cl-Cu HX, Std. Unit, Nat. Gas
MT4000EN18CCAC	Outdoor, Spark Ignition, Less Pump, Cl-Cu HX, Std. Unit, Nat. Gas
MT4500EN18CCAC	Outdoor, Spark Ignition, Less Pump, Cl-Cu HX, Std. Unit, Nat. Gas
MT2200EN18CCAN	Outdoor, Spark Ignition, Less Pump, Cl-Cu-Ni HX, Std. Unit, Nat. Gas
MT2800EN18CCAN	Outdoor, Spark Ignition, Less Pump, Cl-Cu-Ni HX, Std. Unit, Nat. Gas
MT3200EN18CCAN	Outdoor, Spark Ignition, Less Pump, Cl-Cu-Ni HX, Std. Unit, Nat. Gas
MT3600EN18CCAN	Outdoor, Spark Ignition, Less Pump, Cl-Cu-Ni HX, Std. Unit, Nat. Gas
MT4000EN18CCAN	Outdoor, Spark Ignition, Less Pump, Cl-Cu-Ni HX, Std. Unit, Nat. Gas
MT4500EN18CCAN	Outdoor, Spark Ignition, Less Pump, Cl-Cu-Ni HX, Std. Unit, Nat. Gas

Cupro-nickel alloy heat exchanger models and CSO-1 models are available. Contact the factory for part numbers.
