* Requires brace extensions for 48" height - same model accommodates 42" and 48" wall height (part number PN70962) Printing color may vary slightly from actual product. All colors/products subject to change without notice. Models not marked may be available as a special order, please consult with your customer service representative for details.
▲ Requires pole kit support system; modular grid system not available.

Features of Our Thermoplastic Steps

1. Standard Latham Steps are molded from a solid sheet of coextruded Luran®S with an ABS substrate from BASF resulting in a strong, one-piece design, that will never delaminate, splinter, corrode, or puncture.
2. Raised, slip-resistant tread pattern allows for safe and easy pool entry and exit.
3. The high-impact strength and flexibility of weatherable polymers enables Latham Steps to withstand the stress of frost and back fill saturation far better than other materials.

Total Encapsulated Support System

TES Support System (Total Encapsulated Support)

Latham Thermoplastic Steps utilize the patented TES Support System for optimum tread support and strength.

- All 6' and 8' models come standard with recessed jet locations.
- All models come standard with pre-punched gasket holes for easy alignment.

One-piece molded structural grid system supports the entire tread surface and prevents material fatigue.

Modular bracing allows for optional deck support.

THERMOPLASTIC STEP COLLECTION

Strength and Beauty

Latham's strong, sturdy thermoplastic in-wall step adds functional beauty to your pool. Our unique brace system creates a stable, solid step. The thermoplastic surface will never delaminate, splinter, corrode, or puncture.

Our wide variety of steps provide you with many choices for steps to enter your pool, built-in lounges, and even a sunledge for a comfortable place to gather.
