*Material thickness: 6 mm • Color shown: Oxygen • Finish shown: Natural (*Not Available in Marrakech Red)*

Tozen [**təu**-zen]
adjective
origin: Japanese

1. *naturally; as a matter of course; justified; deserved*

Like the art of watercolor, the Tozen collection uses transparency, pigment and light to tell a story. Translucent glass presents our artists the perfect canvas to juxtapose luminosity and darkness...transparency and opacity...rest and movement. The handcrafted, smooth-edged design is available in 19 colors and two finishes to narrate your personal design story.

70% post-consumer recycled glass content ♻
