

ELIMINATES PHOSPHATES

Lo•Phos Max

Reduces Chlorine Demand, Saves Money

Safe. Powerful. Affordable.

Phosphates in your pool water are algae food. Eliminate the food and the algae cannot grow. Lo-Phos Max effectively eliminates phosphates from pool water and minimizes pool maintenance, reducing the use of other chemicals, and saving you money!

- **Eliminates phosphates**
- **Highly concentrated formula**
- **Boosts efficiency of sanitizing chemicals**
- **Helps salt chlorine generators work more efficiently**
- **Compatible with all pool chemicals**
- **Economical and effective**
- **Safe for your family and the environment**
- **Non-toxic**

Like all living things, algae need food to grow. The most effective way to control algae growth is to deprive it of nutrients. Nutrients for algae include the phosphates introduced into the pool by bathers, fertilizers, rain water, vegetation and other pollutants. Lo-Phos Max binds phosphate ions which are then easily filtered out of the water in regular pool circulation. Lo-Phos Max remains pH-neutral and provides pH buffering which aids in pool water balance.

Lo-Phos Max was developed to provide the strongest liquid phosphate remover in the pool products industry. It is non-toxic and when used as directed is safe for people, pets and the environment.
