

Fast Dissolve & EZ•Pour Stabilizers

Instantly Extends Chlorine Life

Maintaining pools just got easier! Lo-Chlor® stabilizers work **FAST** and slow the breakdown of active chlorine due to UV rays from the sun and other adverse effects. Use less chlorine to get sanitized, healthy, pool water. Unlike typical stabilizers, no clumps of messy product will be left on the pool floor or filter. Hassle-free!

Easy to use, too. Just disperse into the pool while they work at stabilizing both liquid and dry types of chlorine.

- Ensures cost-saving, effective results from your chlorine sanitizer
- Dissolves as fast as sodium bicarbonate
- Eliminates extra brushing and clogged filters
- Helps maintain a continuous chlorine residual
- Safe and effective for all chlorine types and salt water pools
- Gentle on all pool surface types

EZ-Pour Stabilizer:

- Available in 1-gallon jug
- Just shake well and pour
- One gallon will raise 30 ppm in 10,000 gallons of water
- Makes pool chlorine last 6-10 times longer

Fast Dissolve Stabilizer:

- Available in convenient 1 lb. pouch
- Easy to carry and transport
- 1 lb. will raise 10 ppm in 10,000 gallons of water

Don't wait to start saving time and chlorine!
