ADVANCED UV PROTECTION

ALL-IN-ONE
POOLSIDE PROTECTION

RESTORES SHINE

PREVENTS FADING

BLOCKS UVA & UVB RAYS

UV DualShield+™

More than just a UV protector, UV DualShield+ is an advanced formula engineered for poolside environments and optimized for above-ground pool applications.

ADVANCED UV PROTECTION

FEATURES

Next-Generation UV Protection

Advanced UV stabilization protects plastics and composites from fading, dulling, and cracking caused by sun exposure.

Superior Adhesion

Adheres perfectly to plastics, vinyls, rubber, and painted surfaces for lasting performance.

Extreme Resistance

Engineered to withstand chlorinated or salt water and repeated cleanings without diminishing gloss or protection.

Versatile and Long-Lasting

Perfect for pool furniture, shells, coping, and accessories exposed to sunlight.

Cutting-Edge Silicone Technology

Our exclusive blend forms a continuous, ultra-smooth film that delivers unmatched gloss and a tough barrier against chemical and mechanical wear.

Deep Conditioning & Flexibility

With high-performance silicone content, this treatment doesn't just shine — it penetrates the surface to restore suppleness and provide long-lasting protection.

Dual-Shield UV System

Dual-Shield UV technology combines two UV filters for full-spectrum UVA/UVB protection to help prevent fading, yellowing, and premature aging.

Lasting Gloss & Protection

Delivers a durable, water-repellent finish that maintains deep gloss and protection season after season with minimal maintenance.

SPECIALLY FORMULATED FOR:

- Pool Structure & Components
- Pool Furniture
- Pool Equipment
- Surrounding Outdoor Elements
- Near water environments (Salt/chlorine resistant)
