

ColorFlo® CF Liquid Color

Uniform, consistent color with the highest solids content in the industry has made Solomon Colors ColorFlo Liquid Color the industry choice for over 30 years. Solomon ColorSelect and QuickColor Systems allow thousands of consistent colors on demand with only 4 or 5 ColorFlo primary colors.

HIGHEST SOLIDS CONTENT

ColorFlo liquid color has the highest solids content in the industry – between 60% and 70%. Customers use, on average, 20% less liquid color per treated yard of concrete with ColorFlo liquid color. Use less pigment to get the same color, saving time, money, and freight.

INNOVATIVE PACKAGING

The signature Solomon Colors V-Bottom Tote virtually eliminates pigment waste. It is stackable and easily moved with a forklift, for efficient operation and pigment transfer. Other standard packaging ranges from 10 ounce bottles to 5 gallon buckets. There's a perfect volume for every size customer.

THE SOLOMON ADVANTAGE

Solomon Colors started blending liquid pigment for concrete in 1986, and we have been the leaders ever since. With the largest liquid color production capacity in North America, a history of innovation, and an industry leading Color Lab, you can count on Solomon Colors to provide the best liquid color for any time, for any project, in any quantity.

ColorFlo® CF Liquid Color Packaging

- 10 oz bottles
- 1, 2, 3 & 5 gal. buckets
- 600 lb drums
- 2000 and 4000 lb. V-bottom totes

908 Carbon Black

For the blackest black, use 908 Carbon Black dry and liquid ColorFlo pigment. 908 Carbon Black is 4 times stronger than 920 Black for a truly "super black" concrete. 908 Carbon Black is a specialty pigment, ideal for a number of applications. It excels at creating shine-free, "black-out" concrete in interior applications, making it a popular choice for restaurant and theater floors.

908 Carbon Black is a natural complement to polished concrete. 908 Carbon Black is used in a number of exterior applications as well. Gas stations and similar facilities use

Carbon Black to hide unsightly oil stains and dirt. It is also used in conjunction with black Color Hardener.

Due to the small particle size, 908 Carbon Black has a tendency to weather out over time, especially in outdoor placements. This is a desirable trait in some applications, creating a look of aged concrete, avoiding a stark white appearance until the concrete can naturally age. A vigorous maintenance program using Brickform sealers can slow or prevent this weathering and retain the strong black color.

CF908 Carbon Black packaging:

CF 908 Carbon Black liquid color:

- 3000 lb. totes
- Case of 4 one-gallon bottles
- Single one-gallon bottles

908 Carbon Black dry integral color:

- 25 lb. repulpable bags

READY MIX COLORS

ColorFlo® CF Liquid / ColorFlo® SG Granular / Dry Integral Color

These color chips represent shades of integral colors based on medium tone gray Type I-II Portland cement with 4” slump. Use this chart as a guideline only. The colors may not exactly represent the final color. Shade variations of cement and aggregate, plus variations in the mix design, volume of water, addition of admixtures and other additives, etc., may have an effect on the final color. Therefore, we recommend that a test slab be poured and approved prior to the start of the job.
