

Features & Benefits

Simple Installation: Package comes factory-assembled with a convenient 6' 115-volt power cord ready to install without the need for on-site wiring.

Pressure Booster: Boosts water pressure with consistent output.

Reduced Footprint: Eliminates the need for a pressure switch and pressure tank, which also reduces the cost over traditional systems.

Pump Protection: The control provides run-dry protection to the pump. An auto-run feature keeps the system free of debris and prevents clogs if idle for more than 24 hours.

Specifications

Model	Item No.	UPC	HP	Volts	Amps	Intake	Discharge

Introducing Red Lion's Newest Addition:

THE RBSS-75FC PRESSURE BOOSTING SYSTEM

The RBSS-75FC booster pump is ideal for homes with a municipal water source and incoming water pressure less than 45 psi. This pressure boosting system assists in maintaining steady pressure when more than one water fixture is in use.

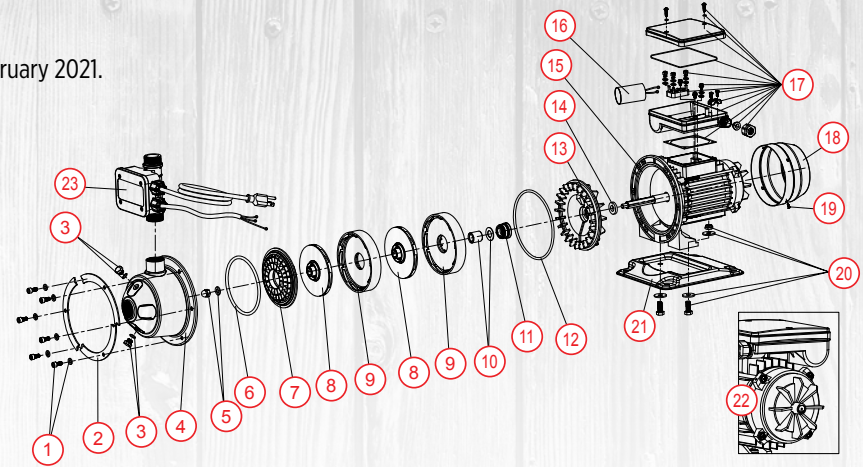

This product is now available! If you have any questions, please contact your local Red Lion Sales Representative or Technical Support at 888.885.9254

Repair Kits

A selection of repair kits will be available in February 2021.

Part Number	Description	Contents
305589007	Casing/Base Kit	1, 2, 3, 4, 21
305589008	Hardware Kit	1, 3, 5, 10, 19
305589009	Overhaul Kit	6, 7, 8 (qty 2), 9 (qty 2), 10, 11, 12, 13, 14
305589010	Impeller/Volute Kit	7, 8 (qty 2), 9 (qty 2), 13
305589011	Seal Kit	6, 12

NOTE: The parts not included in list of repair kits are not available for purchase.

Installation Considerations

A certified plumber is highly recommended for installing this system. To prevent damage to pipes, it's very important to include a pressure regulator and set it at 72.5 psi or less.

Some appliances, particularly hot water heaters, recommend water pressures lower than 72.5 psi. Adjust the pressure regulator accordingly. A pressure relief valve is also recommended.
