

Concrete Resurfacer – Light Gray A-600

Product Description

Americrete Concrete Resurfacer is a powdered proprietary co-polymer mix that is easy to install for large projects or small repairs. This product only needs water added. Designed as a micro topping it can be used in virtually any climate due to its ability to resist freeze/thaw cycles and it's resistant to salt. **Concrete Resurfacer** can be used as a featheredge product and is available in white.

Coverage Rate

Concrete Resurfacer when applied by squeegee will cover 200 to 400 square feet per bag depending upon the application procedures and the porosity of the concrete surface.

Primary Use, Characteristics and Advantages

Concrete Resurfacer eliminates concrete removal and is a single component mixture (add water only). It has superior bonding capabilities, tested at 5510 psi., while maintaining flexibility and weather resistance. **Concrete Resurfacer** has been designed for use as a micro topping that is water resistant and non-reemulsifiable. **Concrete Resurfacer** is environmentally friendly and is ideal for vapor emission control, curb and gutter repair and patching of any spalled concrete surface.

Typical Applications

Walkways, patios, casinos, airport hangers, restaurants, parking structures, pool decks, one step tile set, curbs and gutters, driveways, bridges and warehouse floors. Underlayment for carpet, tile, wood floors, etc... It is also an ideal leveling agent.
