

QwikLED® Retrofit Plate

Presented by Magic Plastics, Inc.

Modern LED Lighting—Made Possible for Older Pools and Spas

QwikLED® was developed to solve a frustrating problem in the pool industry: nearly 95% of pools in the U.S. still use legacy light niches that aren't **compatible** with today's **compact nichless LED lights**.

The **QwikLED® Retrofit Plate** was created to give pool owners and professionals a simple, **cost-effective solution**—no remodel required.

Why Choose QwikLED®?

Retrofit Without the Remodel

QwikLED® installs directly into older-style pool niches using either Adapter or Plaster Plates. No structural changes needed.

LED Performance, Unlocked

LEDs use up to 80% less energy and last up to 20 times longer than traditional pool lighting. QwikLED® makes the upgrade easy.

Multiple Color Options

Available in White, Light Gray, and Dark Gray finishes to complement a variety of pool surfaces.

Now Available in Spa Size

In addition to the standard Pool size, QwikLED® is offered in a compact Spa version for smaller-scale applications.

A Trusted Choice for Pool Professionals

Designed with direct feedback from installers and service techs, QwikLED® offers a clean, reliable finish every time.

Important Note:

QwikLED® is the retrofit plate only. LED light is not included and must be purchased separately.

It's the fast, reliable way to bring the energy savings, longevity, and vibrant color of LED lighting to nearly any pool or spa.

With **QwikLED®**, Magic Plastics, Inc. brings **modern lighting** within reach—without the **demolition** or the drama.

Smart design. Practical innovation.
Proven performance.

From Outdated to Outstanding, Instantly.
Magic Plastics – The Reliable Source.
