

“Smart” Check Valves

Magic Plastics' "Smart" Check Valves are an innovative free-flow design that provides reliable back-flow prevention without the inline restriction of a conventional center poppet Check Valve. With the use of high-powered magnets, the "Smart" Check remains in the closed position to 2 PSI, opening fully when 2 lb. line pressure is exceeded. The "Smart" Check is equipped with a Spring-Loaded gate mechanism, allowing the valve to be installed in virtually any orientation. The "Smart" Check is also available in a non-magnetic, 1/2" lb. Spring Loaded version. In addition, all valves are available in both White and Clear UV Stabilized in 1/2", 3/4", 1", 1 1/2", 2" and 3" IPS sizes. Numerous configurations are offered including Slip x Slip, Slip x Spigot and True Union.
