

Concrete Answers for Better Living®

## Leaders in Innovation for Over 40 Years

## The Mortex Difference

### Concrete Answers for Better Living®

For over 40 years, Mortex has been the contractor's choice for innovative and superior quality products. In 1962, Mortex revolutionized the swimming pool industry with the introduction of Keystone Kool Deck®, a product that literally changed the face of swimming pool decks forever. Since then, Mortex has continued to set the industry standards for product innovation, quality and customer service.

Today, Mortex is the brand to trust. When you're doing your best job, have the quality of Mortex products working for you.

### Thank You for Choosing Mortex Forms

Mortex was the first to create and pioneer the use of disposable cantilever deck forms. Years of continued development have led to a diverse product line that adds to the contractor's possibilities, efficiency, quality, and success. Mortex offers a wide variety of applications and styles for cantilever deck edges, including:

- Four styles of standard forms.
- Forms for fiberglass or vinyl pools.
- Edge solutions for automatic pool covers.
- Forms for concrete countertops, cornice moulding, and cantilever style steps.
- A variety of possibilities for fiber optic lighting.
- A complement of accessories for any poured concrete project.

Contact your local distributor and ask for Mortex.

# Having a Competitive Edge Comes in Many Forms

## Extend Your Efficiency – Quick, Easy, Beautiful

Mortex Cantilever Forms are the premier disposable forms used today by contractors. Mortex introduced the first expanded polystyrene disposable cantilever forms, and has years of manufacturing experience. Designed and engineered for style and

performance, Mortex forms come in a wide variety of designer shapes, are simple to use, and are ideal for a wide variety of applications.

## Patented Anchoring System

Mortex also invented and pioneered the Spear and Button anchoring system, which is far superior to conventional tie wires. This patented button-locking mechanism enables these forms to be set with speed, and then cleanly removed with just a twist of the button.

- Mortex Cantilever Forms are quick to set and even quicker to remove.
- Cove strip acts as a water stop and eliminates the need to grout or caulk the joint between the tile and deck.
- Form flexibility gives designers and contractors endless options in pool shapes (1 ft. radius capability with use of filament tape).

## Many Choices for Style and Elegance

Mortex offers a wide variety of applications and styles for cantilever deck edges.

## An Advanced Attachment System for Vinyl-Liner Pools

**Patented Keylock System**  
Mortex reusable keys are simple to use and economical.

### Elegant Solution Offers Ease and Economy

Mortex aluminum and vinyl Keylock Liner Forms are the perfect solution for the installation of a cantilever deck on a vinyl-liner pool. This patented system offers a unique combination of functionality and practicality.

Simple and easy-to-install keys push right into the liner lock, allowing the form to be set quickly and securely. After installation, the keys are simply removed with a twist and are reusable for the next job.

### Edge Solutions for Fiberglass Pools

Mortex fiberglass cantilever deck forms are designed and engineered for practical use with any in-ground fiberglass pool. Mortex fiberglass forms come with either advanced spear and button system or tie wires to accommodate varying edge widths.

### Automatic Pool Cover Edging

With all of the advantages of our standard Mortex cantilever deck forms, these forms are designed for those who require the built-in convenience of an automatic pool cover system.

# Glow-Rite: Another Bright Idea

## Simple Fiber Optic Lighting System

Now a modern, secure anchoring system allows the contractor to install fiber optic lighting that's permanent. Mortex's Glow-Rite® Lighting Form System is designed for ease of installation and for long, lasting durability. Glow-Rite offers lighting that is visible above an automatic pool cover, and sits above water line – staying cleaner with less mineral, oil or grease deposits than other lighting methods. Glow-Rite comes in two track variations designed to handle the multiple shapes of fiberoptic cabling. It is available in all of Mortex form types including: Standard, Fiberglass, Key-Lock, Automatic Pool Cover, Cornice Moulding and Step Forms.

Glow-Rite offers track variations and an easy-to-use anchor lock system.

## Tac-It: Edge Lighting For the Existing Pool

Now it is possible to add fiberoptic lighting to an existing pool. Mortex offers the only solution available on the market with Tac-It®.

Tac-It is an innovative and patented fastener that allows the contractor to easily, and cost effectively install perimeter lighting on an existing pool edge. Tac-It works on all Mortex cantilever decks containing cove strip, and universally fits all fiberoptic lighting strips.

### **Pour-in-Place Possibilities: Quick to Set and Remove Leaving a Clean, Stylish Edge**

The beauty, feel and longevity of concrete incorporated into tabletops, counters, and other work surfaces is becoming more popular.

Mortex concrete forms offer the contractor a proven solution for this growing market. With a wide variety of edge styles available, Mortex forms will meet the special needs of cast-in-place countertop construction. Mortex applies years of form manufacturing experience to provide easy-to-use and reliable products for the countertop contractor.

# Style and Easy Install: A Step in the Right Direction

## Moulding Forms for Decorative Walls

## Incorporate Cantilever Style to Steps

Cantilever-style steps are now available with Mortex Step Form liner, offering ease of installation and an elegant look for any concrete step. Mortex's step liner forms offer a convenient and decorative alternative to traditional steps. The exclusive Mortex angled edge makes smaller form footprint and allows float access closer to the corner of the step.

- Varying break points on the form allow for full 4", 6", and 8" high steps.
- Angled form bottom allows for float access, not available with wooden forming.
- Cushions against concrete and can be stripped and finished much earlier than traditional forms.
- Bender Boards, or wooden forms may be used to set radius steps.
- Available in a variety of elegant styles.

Mortex Cornice Moulding Forms are designed for the easiest form application of any disposable wall cap in the industry. Mortex's simple Wall Tie and Dog system eliminates the need for cumbersome clamps and mounts. Mortex offers a wide variety of form styles for casting edges for concrete caps, block walls, glass block walls, and planters.
