Ledge Rock™ adds a subtle surface texture to traditional cobble paving stones. Tumbling the pavers accents their natural stone texture. The result is the most natural looking shapes offered in the Romanstone™ product line.

Specifications

Ledge Rock™ is produced using a “no-slump” concrete mix, made under extreme pressure and high frequency vibrations. Unit pavers will meet or exceed the requirements established in the ASTM C936 (standard specification for interlocking concrete paving units). Requirements of this standard include an average compressive strength of 8,000 psi, average absorption no greater than 5%.
